

The Project for the improvement of medical equipment at tertiary hospitals in Bishkek

Project Purpose: The objective of the Project is to strengthen diagnosis and treatment capacities by providing medical equipment for diagnosis and treatment of cardiovascular disease and breast cancer to tertiary hospitals in Bishkek city, thereby contributing to enhancing the quality of health care services in the top referral hospitals.

Project Period: 2024 – 2029

Implementing (Counterpart) Organization(s): The Ministry of Health of Kyrgyz Republic

Estimated Project Cost*: JPY 1.5 billion (USD 9.51 million)

Project Site: Bishkek city (National Center of Cardiology and Internal Medicine, Scientific Research Institute of Heart Surgery and Organ Transplantation, National Center of Oncology and Hematology)

Expected Outcomes:

1. Improved diagnostic and treatment capacities for cardiovascular diseases and breast cancer in tertiary hospitals in Bishkek.
2. Enhanced access to modern and high-quality medical equipment in selected referral hospitals.
3. Strengthened institutional capacity of the Ministry of Health in operating and maintaining advanced medical equipment.
4. Improved quality of healthcare services through timely and accurate diagnosis and treatment.

Key Activities:

1. Procurement and installation of medical equipment for cardiovascular and breast cancer diagnosis and treatment.
2. Technical training for hospital staff on the effective use and maintenance of the new equipment.
3. Regular monitoring and evaluation of equipment usage and impact on patient care.
4. Strengthening cooperation between JICA and the Ministry of Health for sustainable operation of the installed equipment.
