

Master Plan Project for the Development of Value Chains for Vegetables and Certain Types of Crop through Cluster Approach

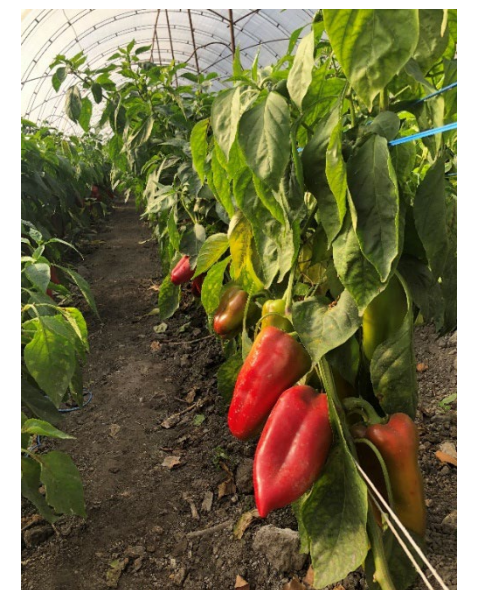

Project Purpose: Promote the cluster approach of the Cabinet of Ministers of the Kyrgyz Republic by establishing the master plan for vegetable and certain types of crop and contribute to the income improvement of stakeholders in the value chain in the Kyrgyz Republic

Project Period: 2024 – 2026

Implementing (Counterpart) Organization(s): Ministry of Agriculture, Water Resources and Processing Industry of the Kyrgyz Republic (MWRAPI)

Estimated Project Cost*: JPY 140 million (USD 888,014)

Project Site: Kyrgyz Republic

Expected Outcomes:

The Master Plan for the Development of Value Chains for Vegetables and Certain Types of Crop through Cluster Approach is developed, including necessary policies actions and future cooperation plan.

Key Activities:

- Identification of crops. Review and finalize the selection criteria for target crops. Conduct initial crops mapping by region and agree on target crops and area.
- Value chain analysis. Establishment of FVCWG and conduct regular FVCWG meeting. Conduct case study on existing value chain development which can contribute to establishment of cluster approach. Identify technical, institutional, infrastructure and policy gaps in target crops cluster based on the survey results. Assess the potential of improvement in productivity, production volume, value addition, trade, and processing in the target crops cluster.
- Development of Master Plan. Propose technical, institutional, infrastructure and policy interventions to increase the target crops cluster potential. Complete the master plan, including necessary policies actions and future cooperation plan.
- Authorization of the Master Plan for the Development of Value Chains for Vegetables and Certain Types of Crop.
