

PROGRAM FOR FOREST INFORMATION MANAGEMENT (FIM)

Project period: March 2010 – March 2012

Project site: Vientiane Capital

Project outline: The objective of FIM is capacity building for the development and management of national-level forest base data necessary for reducing emissions from deforestation and forest degradation. The activities of FIM include the construction of a forest information centre, equipment procurement for forest base map development, technical assistance for forest surveys and remote sensing, etc.
