As of January 2023

Thematic Focus in Water and Sanitation Sector

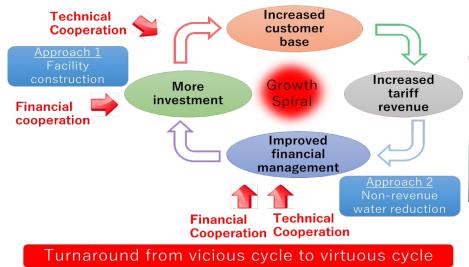

Water Supply: Establish successful model of virtuous circle of water supply management

- Making Faisalabad as a model of virtuous circle of water supply management
- Replicating the model to other major cities in Punjab
- 【Virtuous circle】 More investment
 (Enhance service level) ⇒ Increase
 customer base ⇒ Increase tariff revenue
 ⇒ Improve financial management ⇒ More
 investment ···

Sanitation: Assist major cities in Punjab from hard and soft component to enhance sewerage and drainage services

- Considering development and management of sewerage and drainage system, following after development of water supply system.
- Considering solid waste management issue along with assistance for sewerage and drainage from perspective of urban environment.
