

Do you know “the first flyover in Tanzania”?

You may have heard, saw or experienced the first flyover in Tanzania, Mfugale Flyover, but did you know that it was constructed under the support of JICA? (Photo of the Flyover).

JICA supported the construction of the first Flyover in Tanzania (Mfugale Flyover) at TAZARA Junction, which was completed in September 2018.

It is the main road to the Julius Nyerere International Airport and serves as a connection to other city areas, reducing congestion by an estimated 80%.

Users of the TAZARA intersection are now spending their time more productively instead of tirelessly waiting in traffic jams.

In 1980, JICA supported the improvement and rehabilitation of Dar es salaam city centre roads which were in a very bad shape. The rehabilitation resulted into the promotion of economic activities by facilitating easy and safe movement of people and goods.
