

# Statistics on Program Results

## Interpreting the Statistics

The following shows statistics relating to JICA's operations in FY2008. The methods of calculation and the range of figures are as follows.

1. When categorized according to region, figures for bilateral cooperation are based on classification into six regions. In the case of cooperation spread over two or more regions, the figures are given as "unclassified."
  - (1) Asia (including Central Asia and the Caucasus, excluding the Middle East);
  - (2) Middle East (the west of Iran and the north of Sahara except Sudan);
  - (3) Africa (excluding the Middle East);

- (4) North America and Latin America;
- (5) Oceania; and (6) Europe (including Turkey)
2. The programs are classified into the following five types in regard to the program results by number of participants.
  - (1) Acceptance of technical training participants;
  - (2) Dispatch of experts;
  - (3) Dispatch of study teams;
  - (4) Dispatch of Japan Overseas Cooperation Volunteers (JOCV); and
  - (5) Dispatch of other volunteers

3. Sectoral classification in regard to the Technical Cooperation employs the following 10 categories.
  - (1) Planning/administration;
  - (2) Public works/utilities;
  - (3) Agriculture/forestry/fisheries;
  - (4) Mining/industry;
  - (5) Energy;
  - (6) Business/tourism;
  - (7) Human resources;
  - (8) Health/medical care;
  - (9) Welfare; and
  - (10) Others
4. All other data in connection with JICA's operations and performance together with revisions and updates of achievements and results not appearing in this report shall be posted on JICA's website in a timely and appropriate manner.

Note: The total number of loan commitments in FY2007 and FY2008 does not include the commitment to provide additional loans to one project while the total amount includes this additional loan commitment of ¥17,106 million in FY2007 and ¥10,490 million in FY2008.

On a geographical regional classification basis and with regard to ODA Loan data prior to FY2007, Algeria, Egypt, Libya, Morocco, and Tunisia have been included in figures for Africa (North of Sahara), while Turkey has been included in figures for the Middle East.

With respect to Technical Assistance and Grant Aid data prior to FY2007, Afghanistan, Sudan, and Turkey have been classified under the Middle East.

Loan Outstanding data records the simple difference between the total disbursed amount and the recovered amount, and so does not match the total amount appearing in the balance sheet for "Loans," "Investment Securities," "Affiliated Companies Stock" as well as "Claims in bankruptcy, rehabilitation, stock reorganization or other equivalent claims."

Note: Under "Accumulated," the number of cases does not reflect additional cases that result in an increased amount in loans approved. Changes in actual amounts are on the other hand accounted for in the "Total" column. Amounts are rounded to the nearest billion yen. Any amount under one billion yen is indicated as "0." Blank spaces indicate that no actual amount has been allocated.

Options for Program Type ODA Loan	In case of co-financing, it is possible to apply the same repayment terms as co-financer's lending while maintaining the concessionality of ODA loans. For countries complying with ongoing IMF-supported programs or receiving grants from IDA, it is possible to modify the terms and conditions of the Japanese ODA Loan so as to meet the IMF's concessionality criteria.						

Note: Special Terms for Economic Partnership (STEP) is set and reconsidered on January 15 each year. This is to ensure tied aid eligibility.

The concessionality level of optional terms does not exceed that of standard terms.

Under the EPSA initiative, loans for projects co-financed with the AfDB are extended using "Preferential Terms," determined for each income category; in the case of low-income LDCs, the terms are MIRAI.

A two-step loan extended to the AfDB to cover its sub-loans to private enterprises under the EPSA initiative is extended using such terms and conditions as an interest rate of 0.55% and a repayment period of 40 years with a 10-year grace period.

Irrespective of the country category, the terms applied for disaster recovery assistance projects are MIRAI.

Emergency financial assistance in the form of ODA Loan require a floating rate (6-month LIBOR for yen) with a fixed term of 15 years (three years).

## 1. Sectors and Fields Eligible for Preferential Terms

### The Global Environment

- (1) Forest conservation, forestation
  - (a) Forest conservation and management
  - (b) Afforestation and reforestation
  - (c) Research for forest resources
  - (d) Others (monitoring system etc.)
- (2) Prevention of pollution
  - (a) Prevention of air pollution
 

Examples:

    - Installation of equipment for the prevention of air pollution
    - Rehabilitation of existing power plants contributing to the reduction of air pollution
    - Upgrade and rehabilitation of factories etc.
    - Coal quality selection for the prevention of air pollution
  - (b) Prevention of water pollution
 

Examples:

    - Effluent treatment, recycling of water
    - Sludge treatment, residue treatment
    - Relocation of factories for water pollution prevention
    - Treatment facilities for preventing water pollution in harbors etc.
    - Sewage treatment facilities
  - (c) Waste treatment
 

Example:

    - Collection, processing, disposal of solid waste
- (3) Energy saving and resource conservation
 

Examples:

  - Installation of energy saving facilities and equipment
  - Power plants and transmission and distribution lines for energy saving and resource conservation
  - Centralized city heating system
  - Co-generation
- (4) Conservation of the natural environment
  - (a) Protection of wildlife
  - (b) Marine resource research
  - (c) Genetic resource research
  - (d) Conservation of soil
  - (e) Others (research, monitoring)
- (5) New and renewable energy sources
 

Examples:

  - Photovoltaic power generation, Utilization of solar thermal energy
  - Wind power generation
  - Utilization of heat and power generation through waste treatment
  - Geothermal power generation
  - Biomass energy
  - Utilization of urban waste heat
  - Fuel cells
  - Utilization of exhaust gas
- (6) Protection of the ozone layer
 

Examples:

  - Emission control or collection of CFC etc.
  - Treatment of materials damaging the ozone layer
  - Monitoring
- (7) Marine pollution
 

Examples:

  - Machines or vessels for the prevention of marine pollution
  - Measures for preventing marine disposal of wastes
  - Monitoring
- (8) Desertification protection
 

Examples:

  - Afforestation, protection of forests
  - Agriculture desertification protection
- (9) Water supply for the prevention of infectious disease and poverty reduction

### Human Resource Development Support

- (1) Foreign study or training to Japan
- (2) Expert dispatch from Japan
- (3) Lending to private foreign students in Japan

### Small and Medium Sized Enterprises

Low-interest loan facilities for small and medium sized enterprises focusing particularly on smaller sized businesses

### Support for Peacebuilding

Projects and programs for humanitarian improvement, restoration and reconstruction in peacebuilding countries and their neighboring nations

[Note]

\*1 In cases where a part of the project is eligible for preferential terms, preferential terms can be applied to that part.

\*2 Hydro-electric power generation with no significant impact on the environment can be categorized as a new and renewable energy only in those cases where it can be confirmed that the project will not create problems as a result of deliberate environmental aspect investigation.

2. In order to assist upper-middle income countries to reduce regional income disparities, projects to develop specified economic and social infrastructure in low-income regions will be funded through ODA Loans. This will be in areas where ODA Loans have been hitherto limited in-principle to environmental, human resource development, and anti-seismic measure projects.

## 3. Special Term for Economic Partnership (STEP)

### Overview

The Government of Japan decided to introduce a new ODA loan scheme from July 2002, now called the Special Term for Economic Partnership (STEP), in an effort to raise the visibility of Japan's ODA among the citizens of recipient countries as well as Japan. These schemes utilize and transfer the cutting-edge technologies and know-how of Japanese firms.

### STEP Recipient Countries

Low-Income Countries, Lower-Middle-Income Countries and Middle-Income Countries to which tied aid can be extended under OECD rules (excluding the Least Developed among Less Developed Countries and Upper-Middle-Income Countries)

### STEP-Eligible Projects

(1) Outline: Projects eligible for STEP will be limited to those that are in the following sectors and fields; (2), and at the same time, for which Japanese technologies and equipment are substantially utilized.

### Sectors and Fields

- Bridges and Tunnels
- Ports
- Airports
- Urban mass transit system
- Oil/Gas transmission and storage facilities
- Urban flood control projects
- Communications/Broadcasting/Public information systems
- Power stations/Power transmission and distribution lines
- Trunk roads/Dams (limited to projects that substantially utilize Japan's anti-earthquake techniques, ground treatment techniques and fast implementation techniques)
- Environmental Projects (limited to projects that substantially utilize Japan's air-pollution prevention techniques, water-pollution prevention techniques, waste treatment and recycling techniques and waste heat recycling and utilization techniques)

### Interest Rates and Repayment Period

Interest rates and repayment periods are set so as to enable the extension of tied aid under OECD rules, and revised annually on 15 January.

### Procurement Conditions

Primary contracts are tied to Japanese firms, while subcontracts are generally untied. Joint ventures with recipient countries are accepted for primary contracts, on condition that the Japanese firm is the leading partner.

### Coverage Ratio

ODA loans may be used to finance up to 100% of the total project cost.

### Country of Origin Rule

Not less than 30% of the total amount of the principal contract financed with ODA loans must be accounted for by either (a) goods originating from Japan together with services provided by Japanese firms, or (b) goods procured from Japan. See chart below.

Category	Example
In the case of projects for which advanced technologies and/or know-how of Japanese firms can be identified in services (e.g. construction methods), not only goods but also services must be included in the ratio mentioned.	Tunnels, ports, concrete bridges, trunk roads, dams, sewerage systems, urban underground headrace tunnels, public information systems, hydroelectric power, and geothermal power, etc.
In the case of projects, which mainly consist of the installation of goods or plants and their core technologies that can be identified in goods or plants, only goods shall be included in the ratio mentioned.	Communications/broadcasting facilities, wind/solar/thermal power generation, oil/gas transmission and storage facilities, waste treatment sites, waste incineration plants, steel bridges, urban mass transit systems, urban flood control projects, power transmission and distribution line, etc.

### Procurement Audits

The procurement process is audited by a third party after bidding to ensure fairness, utilizing loan funds or JICA research expenses.

Note: Please refer to page 201 for the classification of principal country income levels.
