Japan's ODA

What is ODA?

Various organizations and groups, including governments, international organizations, non-governmental organizations (NGOs) and private companies, carry out economic cooperation to support socioeconomic development in developing countries. The financial and technical assistance that governments provide to developing countries as part of this economic cooperation are called Official Development Assistance (ODA).

Types of ODA

ODA is broadly classified into two types: bilateral aid and multilateral aid. Multilateral aid consists of financing and financial contributions to international organizations, while bilateral aid is provided in three forms: Technical Cooperation, Loan Aid and Grant Aid. In addition, other schemes of bilateral aid includes the dispatch of volunteers.

3 JICA's Integrated Implementation of Assistance Schemes

In recent years, developed countries in Europe and North America have expanded ODA as a means of strengthening the efforts to address global issues such as climate change and poverty reduction. Furthermore, new donor countries including China and the Republic of Korea have emerged. Japan, conversely, has decreased its ODA budget as a result of its severe financial circumstances.

In view of this international situation as well as the flow of domestic administrative reforms, the Japanese government has undertaken reforms that strategize ODA policies and strengthen implementation systems with the objective of further raising the quality of its ODA. With the aim of integrating ODA implementation organizations as part of these reforms, Overseas Economic Cooperation Operations of the Japan Bank for International Cooperation (JBIC) and Grant Aid Operations of the Ministry of Foreign Affairs of Japan (MOFA) (excluding those which MOFA continues to directly implement for the necessity of diplomatic policy) were transferred

to JICA as of October 1, 2008, thereby creating a "New JICA." Through this integration, the three schemes of assistance have become organically linked under a single organization, which better enables JICA to provide effective and efficient assistance. The principal schemes of assistance are outlined below.

Bilateral Aid

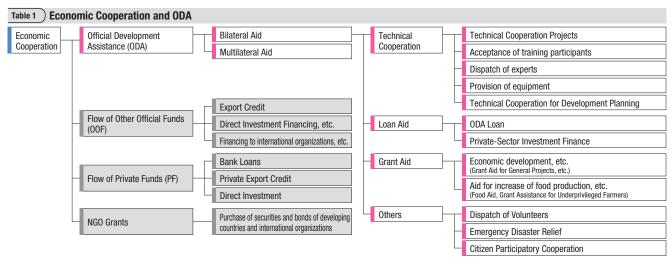

Technical Cooperation

Technical Cooperation draws on Japan's technology, know-how and experience to nurture the human resources who will promote socioeconomic development in developing countries. Moreover, through collaboration with partner countries in jointly planning a cooperation plan suited to local situations, Technical Cooperation supports the development and improvement of technologies that are appropriate for the actual circumstances of these countries, while also contributing to raising their overall technology levels and setting up new institutional frameworks and organizations. These enable partner countries to develop problemsolving capacities and achieve economic growth. Technical Cooperation includes acceptance of training participants, dispatch of experts, provision of equipment and implementation of studies aimed at supporting policymaking and planning of public works projects (Technical Cooperation for Development Planning).

• Loan Aid

Loan Aid supports the efforts of developing countries to advance by providing these nations with the capital necessary for development under long-term and substantially lower interest rates than commercial rates. The primary types of Loan Aid are ODA Loans and Private-Sector Investment Finance. ODA Loans in particular enable the provision of finance in larger amounts compared with Technical Cooperation or Grant Aid, and therefore this form of aid has been well utilized for building large-scale basic infrastructure in developing countries.

Unlike Technical Cooperation or Grant Aid, Loan Aid requires full repayment by the recipient country, which encourages the beneficiary country to focus closely on the importance and priority

of projects and to make efforts to allocate and utilize the funds as efficiently as possible.

Grant Aid

Grant Aid, which is an assistance method that provides necessary funds to promote socioeconomic development, is financial cooperation with developing countries with no obligation for repayment. Particularly in developing countries with low income levels, Grant Aid is broadly implemented for building hospitals, bridges and other socioeconomic infrastructure, as well as for promoting education, HIV/AIDS programs, children's healthcare and environmental activities, which directly support the improvement of living standards.

Grant Aid is divided into the following categories according to its content: Grant Aid for General Projects; Non-Project Grant Aid; Grant Aid for Grassroots Human Security Projects; Grant Assistance for Japanese NGO Projects; Grant Aid for Human Resource Development (Scholarship); Grant Aid for Cooperation on Counter-Terrorism and Security Enhancement; Grant Aid for Disaster Prevention and Reconstruction; Grant Aid for Community

Empowerment; Grant Aid for Fisheries; Cultural Grant Assistance; Emergency Grant Aid; Food Aid; Grant Aid for Underprivileged Farmers; Grant Aid for Environment and Climate Change; Grant Aid for Poverty Reduction Strategies; and Grant Aid for Conflict Prevention and Peacebuilding [→ for portion implemented by JICA, see page 130].

Providing Financing and Contributions to International Organizations through Multilateral Aid

Multilateral aid is an indirect method of providing assistance to developing countries by providing financing or donating funds to international organizations. Funds are contributed to the various bodies of the United Nations, including the United Nations Development Programme (UNDP), United Nations Population Fund (UNFPA) and the United Nations Children's Fund (UNICEF), while financing is provided to multilateral development banks (MDBs) such as the World Bank, the International Development Association (IDA, also known as the Second World Bank) and the Asian Development Bank (ADB).

Notes) 1. The following 12 countries and regions are graduate countries that have received ODA: Brunei Darussalam, Singapore, Kuwait, Qatar, United Arab Emirates, Israel, Hong Kong, Cyprus, Malta, Slovenia, Bahrain and Saudi Arabia.

- 3. Individual totals may not be equal to the sums of the individual parts because some numbers have been rounded off.
 4. Following the decision of OECD DAC Working Party on Statistics (WP-STAT), from fiscal 2009, contributions for European Bank for Reconstruction and Development (EBRD) will be partially calculated as ODA.
- 5. Debt relief includes waiver of ODA Loans and debt reductions of collateralized commercial obligations, but excludes deferring of repayments.
- 6. In the past, grants through international organizations were treated as "contributions and financing to multilateral organizations." However, from 2006, donations for recipient countries identified at the time of contribution are treated as "Grant Aid" for these countries.
- at the time of combination are fleated as a drain will be reached as a fleated as a combined on the second of the

4 International Trends in Developmental Assistance

As exemplified by the Millennium Development Goals (MDGs) [→ See page 78–79], an international trend in aid has recently been the accelerating move toward the establishment of common goals by the international community, where various countries and organizations implement aid in coordination with each other to achieve the goals. Compared with aid coordination in the past which emphasized cooperation and coordination on an individual project basis, development assistance in recent years has placed greater emphasis on ownership by partner countries, in which donor countries and aid agencies jointly support developing countries' own development plans and priorities and work together to achieve the development goals of these countries. Providers of aid thus need to offer assistance in accordance with the priorities set out in the development strategies of developing countries.

Japan's ODA Contribution Level

On a net disbursement basis, in 2010 Japan contributed approximately US\$7,321.8 million (approximately ¥642.6 billion) in bilateral ODA and contributed and donated approximately US\$3,723.4 million (approximately ¥326.8 billion) to international organizations. Accordingly, total ODA contributions amounted to approximately US\$11,045.2 million, up 16.8% from the previous year (a year-on-year increase of 9.7% to ¥969.3 billion on a yen basis). With this amount, Japan ranked fifth among the member

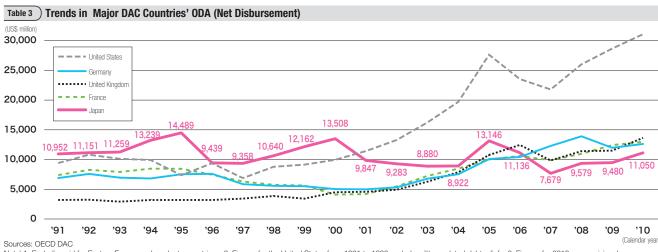

countries of the Development Assistance Committee (DAC) of the Organization for Economic Co-operation and Development (OECD), after the United States, United Kingdom, France and Germany.

Historically, Japan became the world's top contributor of ODA in 1989, surpassing the United States, which until that time had held the top position. Japan then remained the leader among the DAC countries, maintaining its top rank for eight years from 1993 to 2000. However, the country's contribution dropped in 2001 and began a gradual decline, with the exception of a temporary notable increase in 2005.

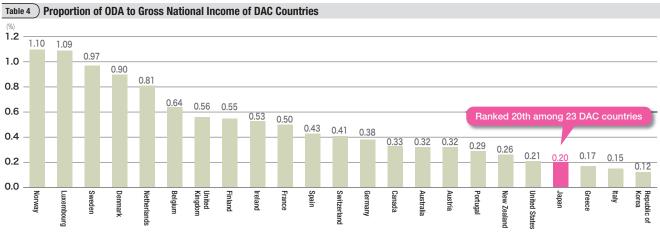

Meanwhile, Japan's ODA was equivalent to 0.20% of its gross national income (GNI), ranking it at the low level of 20th among the 23 DAC countries.

On the other hand, while MOFA's ODA budget has declined, ODA disbursements in 2010 rose due to an increase in Grant Aid for Afghanistan, Pakistan and Haiti, among other assistance, coupled with the yen's further appreciation.
