**JICA’s Medium-term Plan/Annual Plan for Business year 2015**

1 **JICA Medium-term Plan**

In accordance with Article 30, Paragraph 1 of the Act on General Rules for Incorporated Administrative Agency (Act No. 103 of 1999), the Japan International Cooperation Agency (JICA) has set the following Medium-term Plan for achieving its Medium-term Objective during a period commencing with business year 2012.

Taking into consideration the circumstances surrounding development assistance set out in the Medium-term Objective, JICA will follow its vision of “Inclusive and Dynamic Development” in effectively conducting projects in accordance with the Government of Japan’s initiatives and policies regarding Official Development Assistance (ODA). Guided by the vision, JICA will promptly deliver comprehensive assistance for people living in the developing area on issues including addressing the global agenda, reducing poverty through equitable growth, and improving governance from the standpoint of ensuring human security. In following this plan, JICA staff will remain particularly conscious of the enormous assistance offered by many countries after the Great East Japan Earthquake, as well as the necessity of pulling together with the rest of the nation in the reconstruction drive following this catastrophe. With these points in mind, JICA will move ahead with efforts that meet the expectations of other countries. In addition, taking full advantage of its position as one of the few public sector organizations in Japan that operates projects in the developing area at large while also having offices across Japan, JICA will correlate the domestic challenges and experiences with those of other countries to contribute to solution of issues both in Japan and other countries.

Since its launch as a renewed organization in October 2008, JICA has become the sole implementing agency for Japan’s all major ODA schemes — Technical Cooperation, Loan Assistance and Grant Aid, enabling JICA to provide optimum cooperation to the developing area facing various development issues through organic combinations of different schemes, taking into account the characteristics of each scheme. Going forward, JICA will further deepen the synergetic effects of its merger and promote program approach in line with the government policy as a means to increase its competitiveness internationally and implement more strategic operations. JICA will build a broad network with Japanese NGOs, private enterprises including small and medium-sized enterprises (SMEs), academic institutions such as universities, and municipalities and bring together the knowledge and experience of an “all-Japan” team to solve development issues.

JICA will further strengthen its organizational expertise in such areas as analysis and problem solution, which is needed in operation management, through incorporating international trends of development assistance in addition to the knowledge JICA has accumulated in the field. JICA will make intellectual contribution to support the government to play a leading role in development assistance arena through strengthening external communications skills and deepening cooperation with partners in the international community. Through these measures, JICA will respond to the expectations of the international community and, by enhancing transparency, gain public understanding, support and empathy for international cooperation.

In addition, JICA will regard critical views in Japan against management of incorporated administrative agencies at large and that of JICA sincerely, and to fulfill its mandate entrusted by the Japanese people conduct operations in a more strategic, effective and efficient manner through improving organization and operations continuously and autonomously.

In executing the Medium-term Plan, JICA will make every effort possible while continuing to collaborate with associated government institutions. JICA will set goals that are as quantitative and concrete as possible in its annual plan, with consideration to the characteristics of JICA’s operation.
