1. India - Japan Relations
History of India - Japan Relations

- **Introduction of Buddhism** to Japan from India.
  
  In 752, an Indian monk Bodhisena (बोधिसेन) performed eye-opening of the Great Buddha built in Tōdai-ji Temple, Nara Prefecture, Japan.

- In Meiji Era, **India's cotton** stimulated the textile industry development in Japan. (Up to 10% of import amount from India at the end of Meiji Era.)

- In 1948, at the International Military Tribunal for the Far East in Tokyo after WWII, Indian Justice Radhabinod Pal became famous for his fair judgement.

- In 1951, then Prime Minister Jawaharlal Nehru refused to attend the San Francisco Peace Conference from a broader perspective, and at the time of establishing official diplomatic relations in 1952, India **waived all reparation claims** against Japan tolerantly.

- **Indian iron ore** supported the steel industry development in Japan (Up to 30% of import amount from India in 1960.)

- In 2011, 46-member team of **NDRF (the Indian National Disaster Response Force)** operated search and rescue operations in Onagawa Town, Miyagi Prefecture, just after **the Great East Japan Earthquake**.
India - Japan Political Relations

- Apr. 1952  Established official diplomatic relations
- 1958      Japan's first ODA Loan in the world extended to India
- Aug. 2000  "Japan-India Global Partnership in the 21st Century"
- Apr. 2005  Japanese PM Koizumi visited India. Annual based PMs mutual visits started
- Dec. 2006  "Joint Statement Towards Japan-India Strategic and Global Partnership"
- Sep. 2014  Indian PM Modi visited Japan

"Tokyo Declaration for Japan-India Special Strategic and Global Partnership"

  a) Doubling Japan’s foreign direct investment in India within five years.
  b) Doubling the number of Japanese companies in India within five years.
  c) JPY 3.5 trillion (Rs. 2 trillion) of public and private investment and financing to India from Japan, including ODA, within five years.

- Dec. 2015  Japanese PM Abe visited India (Delhi and Varanasi)
- Nov. 2016  Indian PM Modi visited Japan (Tokyo and Hyogo)
- Sep. 2017  Japanese PM Abe visited India (Commencement ceremony of HSR in Ahmedabad)
More than 1,300 Japanese companies have started business in India. (approx. 2.5 times more than 10 years ago)

Japanese citizens living in India have doubled in 10 years

Japanese companies in India
As of Dec. 2017

Japanese living in India
As of Oct. 2017

http://www.in.emb-japan.go.jp/Japanese/2017_co_list_jp.pdf

2. JICA’s Policy and Activities
What is “JICA”?

✓ **JICA** is a *governmental agency* of Japan that coordinates official development assistance (ODA)

* Part of grant aid is provided by the Ministry of Foreign Affairs.
JICA’s Policy: Towards sustainable development

- Sustainable Development
- Economical Development
- Private Sector Participation

Business Environment Improvement

(1) Infrastructure development
(2) Policy/institutional improvement
(3) Human resource development

Inclusive Development
JICA’s Contribution to Development Agenda of India

Possible Contribution by JICA

Priority Areas and Sectors (Support through ODA Loans)

- Urban Development (Water Supply and Sewage)
- Railway utilizing Japanese Technologies (High Speed Rail, etc.)
- Private Sector Development (Economic Corridor, Skill Development, Infrastructure for Industrial Development, Power and Energy)
- Rural, Environmental Issues (Forestry, Agriculture)
- North East Region, Special Category States, Island Areas

Technical Assistance, etc.

Comprehensive Support for SDGs (Policy Program Loans, etc.)

SDGs

- Urbanization
- Industrial Development
- Inclusive Rural Growth
- Other Agenda
- Regional Cooperation (Asia/Africa)

Assistance Policy

- Sustainable and Inclusive Growth
- Strengthening Industrial Competitiveness
- Enhancing Connectivity
- Regional Cooperation

JICA’s Contribution to Development Agenda of India

JICA Country Analysis Paper (JCAP) FY 2017
Accumulated Commitment by FY2017/18:
- JPY 5.3 trillion in total
  (equivalent to over Rs. 3 lakh crore)

Operational Results in FY2017/18:
Commitment: JPY 398.4 billion
  (equivalent to about Rs. 25,000 crore)
Disbursement: JPY 264.3 billion
  (equivalent to over Rs. 16,000 crore)

Terms and conditions: (as of Jan. 2018)
- General terms: Interest rate 1.5%, repayment period 30 years (including 10 years grace period)
- STEP: Interest rate 0.1%, repayment period 40 years (including 12 years grace period)

Grant Aid
- Two on-going projects in Varanasi & Bengaluru

Technical Cooperation
- Results in FY 2016/17
  JPY 16.0 billion (about Rs. 850 crore)
- About 1100 Japanese experts to India
- About 250 Trainee from India to Japan

Citizen Partnership / Public-Private Partnership
- Japanese Volunteers
- Japanese NGO activities
- Partnerships with Private-Sector Activities

Major Sector (FY2008/09-2017/18)
- Transport 64%
- Others 9%
- Agri & Forest 6%
- Energy 9%
- Water 12%
- Metro 33%
- DFC 17%
- Others 14%

India is JICA’s Largest Development Partner in the World
Soft Loan

Water 12%
Energy 9%
Agri & Forest 6%
Others 9%
Transport 64%
3. Quality Infrastructure
Quality Infrastructure

- (increasing aging infra.) x (risk of degradation) = !
- US experienced “aged era” for bridges from 1980s, Japan entered from 2010s. (c.f. America in Ruins)
- **Massive future set-back cost may be derived.**
  ⇒ *High quality infrastructure as a risk mitigation solution*

The transition of bridge construction in US and Japan

The cost for bridge maintenance in US
Quality Infrastructure

Salient Features
to be expected under “Quality Infrastructure (QI)”;

- **Stable / Reliable**
- **Sustainable**
- **Long-term / Resilient**
- **With a lot of Beneficiaries / Inclusive**

c.f. Guidebook on Quality Infrastructure Development and Investment (APEC 2014)
Quality Infrastructure

Key Elements

for appropriate project selection/prioritization, procurement and implementation management:

- **Life Cycle Cost**
  - VfM, Durability, Maintainability

- **Envir. and Social Considerations**
  - PAP, Gender, Vulnerable Persons, Universal Service

- **Safety Assurance**
  - Both in Construction and Operation Stages

c.f. APEC Guidebook (2014)
4. Metro Projects
Cooperation on Metro Projects

JICA is supporting metro projects in 6 major cities in India

**Ahmedabad Metro**
- Total Length: 38 km
- Project Cost: JPY 246 Billion (about Rs. 15,000 crore)
- Completion Year: 2020
- Under Construction

**Mumbai Metro**
- Total Length: 34 km
- Project Cost: JPY 621 Billion (about Rs. 39,000 crore)
- Completion Year: 2021
- Under Construction. New plan for Line 2 and 4 is coming up.

**Kolkata Metro**
- Total Length: 16 km
- Project Cost: JPY 140 Billion (about Rs. 9,000 crore)
- Completion Year: 2021
- Under construction

**Bangalore Metro**
- Total Length: 42 km
- Project Cost: JPY 307 Billion (about Rs. 19,000 crore)
- Completion Year: 2017
- Phase-2 is under construction

**Delhi Metro**
- Total Length: 351km
- Project Cost: JPY 1,274 Billion (about Rs. 80,000 crore: Phase 1-3)
- Completion Year: 2020 (Phase-3)
- Phase 4 plan is coming up

**Chennai Metro**
- Total Length: 53 km
- Project Cost: JPY 386 Billion (about Rs. 24,000 crore)
- Completion Year: 2020 (Phase-1)
- Phase-1 under construction
Safe, Timely, Comfortable Move for Better Life

- **Safe** operation
- **Timely & Stable** (with reliability, efficiency and comfort)
- Considerations for environmental harmonization, operation and maintenance, managerial/financial sustainability
- Coordination with various stakeholders for better operation/service

“Quality Infrastructure”
5. Western Dedicated Freight Corridor (WDFC)
The backbone of DMIC (Delhi-Mumbai Industrial Corridor)

WDFC (Delhi–Mumbai: 1,500 km) will focus on:

1. construction of new dedicated freight lines
2. installation of automated signal & telecommunication
3. introduction of electric locomotives with high-speed & high-capacity transportation

Construction is underway (Almost all tendering are completed)
### Western Dedicated Freight Corridor (DFC) Project

#### Electric Traction System

- **Maximum speed**: 100 km / h
- **Transport time** (Delhi – Mumbai): 20 hours (approximately)

#### Double Stack Container Wagon

- **Maximum speed**: 30 - 40 km / h (approximately)
- **Transport time** (Delhi – Mumbai): 48 - 72 hours (approximately)
6. Mumbai-Ahmadabad High Speed Rail (MAHSR)
MAHSR

- **Joint Feasibility Study (F/S)** conducted by JICA and Ministry of Railway from Dec. 2013 to July. 2015.
- Both sides confirmed the use of **Japanese high speed rail technologies (i.e. the SHINKANSEN system)** and experiences, in line with the result of the joint F/S at the Japan-India Summit Meeting (December 2015).
- **Follow-Up Study** conducted by JICA from Mar. 2016 to Feb.2018
- In the latest Japan-India Summit Meeting (September 2017), the two Prime Minister welcomed:
  1. Steady progress, including the **project commencement at the Sabarmati Station**, witnessing the **construction commencement** of training institute in Vadodara
  2. Provision for a soft **ODA loan amounting to JPY 100 billion**
  3. Business matching efforts to establish Japan-India cooperation for advancing “**Make in India**” and **technology transfer** HSR projects
- JICA has been providing with utmost **technical support** (for CD);
  - Formulation of **technical standards**,
  - **Safety certification** measures,
  - Strengthening the **institutional capacity of NHSRCL**
  - Urban development planning of stations and surrounding areas for enhancement of the **connectivity** and **non-fare revenue**, etc.

![Image of HSR Train]

![Image of Route Map]
The impact of HSR on development of India

Safe, comfortable and punctual HSR

- Boost economic development
- Stimulate regional development
  - mitigate excessive concentration on large cities
  - lead to balanced economy
- Promote “social innovation” by introducing Japan’s;
  - Technology
  - Discipline
  - Perfection
  - Teamwork Concept
7. Energy Sector
Operation result

- **9.3GW** of generation capacity
  (3% of Indian total Capacity)
- **1.0GW** of Renewable Energy
- **85 Projects**
- **JPY 1.3 Trillion (≒ Rs. 80,000 crore, US$ 1.2 bil.)**
  (roughly 25% of JICA’s total cooperation in India)

- **ODA Loan**

- **Technical Cooperation**
  Study for Updating Exhausted Coal Thermal Power Plant

**Purulia Pumped Storage Project (I), (II), (III)**
- 1995 – 2008, West Bengal
- 900MW : 12% of the peak demand of West Bengal

**Umiam Hydro Power Station Renovation Project**
- 2004 – 2012, Meghalaya
- Capacity was improved from 18MW to 20MW
- 530 hours unplanned non-operation time due to malfunction (2002 before the project) → 0 hour for three years after the project completion
Major issues in energy sector in India
(1) More involvement of private sector in RE
(2) Ancillary service to take care of fluctuation caused by large scale RE
(3) Better energy efficiency such as T/D loss reduction

Other issues
• Increasing demand for electricity
• Infrastructure/electricity demand for EVs
• Environmental issues from existing coal power plant
• Frail financials of DISCOMs
• Energy saving
• New technologies such as advanced battery

JICA’s Activities
• New and Renewable Energy Development Project with IREDA
• Pumped Storage Project with Soft Loan
• Transmission/Distribution Project with Soft Loan
• Training Programs
• Energy Saving Project with SIDBI
- Recent ODA Loan Projects -

- Generation -
  - Rural Electrification Project (FY2005)
  - New and Renewable Energy Development Project (FY2011, FY2014)

- Transmission and Distribution -
  - Haryana Transmission System Project (FY2007)
  - Haryana Distribution Upgradation Project (FY2013)
  - Madhya Pradesh Transmission System Modernisation Project (FY2011)
  - Madhya Pradesh Transmission System Strengthening Project (FY2015)
  - Maharashtra Transmission System Project (FY2007)
  - Bangalore Distribution Upgradation Project (FY2006)
  - Tamil Nadu Transmission System Improvement Project (FY2012)
  - Odisha Transmission System Improvement Project (FY2015)
  - Transmission System Modernization Project in Hyderabad (FY2006)
  - AP Rural High Voltage Distribution System Project (2010)
  - Bakreswar Thermal Power Station Project (FY2002)
  - Haryana Transmission System Project (FY2007)
  - Haryana Distribution Upgradation Project (FY2013)
  - Bakreswar Thermal Power Station Project (FY2002)
  - Transmission System Modernization Project in Hyderabad (FY2006)
  - AP Rural High Voltage Distribution System Project (2010)
  - Transmission System Modernization Project in Hyderabad (FY2006)
  - AP Rural High Voltage Distribution System Project (2010)

(More than two States)

West Bengal
- Transmission System Modernization Project in Hyderabad (FY2006)
- AP Rural High Voltage Distribution System Project (2010)

Legend
- Generation
- Transmission and Distribution
8. Water Sector
Water Sector  Comprehensive assistance by utilizing Japanese knowledge

Issues

① Demand / supply gap
- Only a few hours of water supply can be provided per day, even in urban areas
- Further increase in demand is inevitable due to the growth of population and economic development

② Financial vulnerability in water-supply corporations
- NRW* ratio is 52% in Delhi and 51% in Bengaluru, compared to 4% in Tokyo**
  
  *the difference between the water distribution volume and the billed volume
  ** Japan Water Research Center Dec 2017

③ Environmental, sanitary and health issues
- Decrease of groundwater levels and contamination of water by toxins such as arsenic and fluorine
- Contamination of rivers due to lack of sewerage system, leading to health hazards such as diarrhea and hepatitis

Low Quality of Service
- Intermittent water supply: Only 1-6 hours of supply in major cities
- Low water pressure: The need of electric water pumps
- Water contamination: Infiltration of wastewater into the water pipes

Vulnerable financial structure
- Water tariff: Rs.6/kL 〜 36/kL
- Charge collection ratio: Below 50% in some cities
- Non-revenue water ratio: Over 40%

A countermeasure for non-revenue water: water leakage detection

Lack of Water and Sewerage Infrastructure

A vicious circle

Unpaid tariff, water theft etc

① Demand / supply gap
② Financial vulnerability in water-supply corporations
③ Environmental, sanitary and health issues
Our Works

Non-revenue water (NRW) reduction
To reduce non-revenue water, renewal of water pipes and meters and installment of SCADA / GIS system are implemented. Capacity development is also addressed.

Projects throughout the country
In major cites, such as Agra, Varanasi, Bengaluru, Hyderabad, Jaipur and Delhi
   Total number of beneficiaries :
      Water Supply: approx. 30 million people
      Sanitation : approx. 15 million people

Rejuvenation of rivers
Assistance for rejuvenation of the Ganga River and Yamna river over the last 20 years toward hygienic environment.

Goa’s case of NRW Reduction

Assistance Policies

① Improving water and sewerage infrastructure in major cities and industrial areas

② Utilizing Japanese knowledge, experience, and advanced technology
   • Introduction of SCADA・GIS system
   • Advanced wastewater treatment
   • Cooperation with municipalities of Japan, with Tokyo City in Delhi and with Yokohama City in Jaipur

③ Enhancing Sustainability
   • Enhancing O/M capacity
   • Securing financial stability by ensuring the collection of water tariff
   • Enhancing of public awareness for safety water and sanitation
Consideration of further assistance based on data collection survey on toilet facilities in India

Outline of the Survey

Survey target: All of India
Objective: Updating information about gender and sanitation in India needed for deriving suggestions for further efforts.

Current Situation of Toilets in India

1) India as the biggest open defecation country in the world
   • India accounts for 60% of the world population practicing open defecation.
     Open defecation population worldwide: 90 crore, India: 52 crore

2) Infectious diseases due to open defecation, especially in children
   • Diarrheal diseases and its complications account for 9% of cause of death of children under five, most caused by oral infection of bacteria in excretion.
   • India has the largest number of under-five deaths (1.2 lakh) due to diarrhea in the world.

3) Serious security and health issues for women, due to lack of toilets
   • Due to open defecation in hidden places or night times, many women face serious security issues such as sexual offence.
   • Lack of clean and safe toilets lead to refraining from defecation for a long period of time, resulting in health problems of the digestive system.

4) Indian Government’s intensify efforts for improvement of sanitation
   • Government of India aim to achieve an Open-Defecation Free (ODF) India by 2019.
Rural water supply and fluorosis mitigation project in rural areas

Major issues in rural area

- Shortage of safe drinking water
- Widespread fluorosis: More than 10 million people is under the risk of fluorosis
  (National Programme for Prevention and Control of Fluorosis Revised Guidelines 2014)

Ongoing Projects:

- Rajasthan Rural Water Supply and Fluorosis Mitigation Project (Nagaur)
- West Bengal Piped Water Supply Project (Purulia)

Photos from Hogenakkal Water Supply and Fluorosis Mitigation Project (Completed) in Tamil Nadu

Dependence on fluorine contaminated groundwater

Safe surface water should be supplied
Improving water and sewerage infrastructure mainly in metropolitan areas and industrial areas

- Strengthening O&M capacity for Delhi Water Supply Improvement Project (Completed)
- Amritsar Sewerage Project
- Yamuna Action Plan Project
- Agra Water Supply Project
- Non-revenue Water Reduction for Jaipur Water Supply Project (Completed)
- Rajasthan Rural Water Supply and Fluorosis Mitigation Project (Nagaur)
- Goa Water Supply and Sewerage Project
- Capacity Development Project for Non-Revenue water (NRW) Reduction in Goa (Completed)
- Project for Pollution Abatement of River Mula-Mutha in Pune
- Delhi Water Supply Improvement Project
- Ganga Action Plan Project (Varanasi)
- Guwahati Water Supply Project
- Guwahati Sewerage Project
- West Bengal Piped Water Supply Project (Purulia)
- Orissa Integrated Sanitation Improvement Project
- Hussain Sagar Lake and Catchment Area Improvement Project (Completed)
- Hogenakkal Water Supply and Fluorosis Mitigation Project (Completed)
- Kerala Water Supply Project (completed)
- Bangalore Water Supply and Sewerage Project
- Tamil Nadu Urban Infrastructure Project (Completed)
- Double line: Technical Assistance Single line: Yen Loan

The Study for Formulation and Revision of Manuals on Sewerage and Sewage Treatment (Completed)
9. Forestry Sector
**Issues**

1. **Forestry Management**
   - Forestry coverage in India is 21.5% (2017), which is lower than the national target (33%) and world average (31%).
   - The population depending on forest is approx. 200 million, and most of them are below poverty line. (2011)
     → Supported by JICA assisted project’s IG Activities

2. **Biodiversity**
   - There are four biodiversity hotspots in India among world’s 35 hotspots (East Himalaya, West Ghats, India-Burma, Nicobar). The number of endangered species is increasing due to environmental pressure and human’s intervention.
   - There are many protection areas in India (102 National Parks, 515 Wildlife Sanctuaries) and these areas need to be conserved with associated ecosystem services.
   - Capacity development of Forest Department needs to be strengthened essentially in order to preserve sustainable biodiversity and harmonious environment.

3. **Disaster Management**
   - Flooding and landslide disaster in mountainous region occur frequently and need to be mitigated by improving the quality of forest.
Forestry Sector

Implementing Income Generation (IG) Activities for Forest Dwellers too

Progress

JICA is the largest donor in the forestry sector in India.

■ ODA Loan
  • Cumulative commitment since 1991 stands at JPY 257.7 billion (approx. Rs. 16,000 crore or about USD 2.3 billion) in the forestry sector. (as of Mar. 2018)
  • Supporting the policy of the Government of India on Joint Forest Management: participatory forest management targets sustainability and the following four major points are the core areas of JICA’s cooperation according to different features of each state:
    ① Sustainable Forest Management
    ② Livelihood Security
    ③ Institutional Strengthening and Capacity Building
    ④ Technology-based Management and Monitoring
  • Disaster prevention and preparedness components are included in Uttarakhand Forestry Resources Management Project in addition to forestry related components (L/A: April 2014)

■ Technical Cooperation
  • Capacity Development for Forest Management and Personnel Training Project (2009.3-2014.3)
  • Project for Natural Disaster Management in Forest Areas in Uttarakhand (2017.3-2022.3)
Major Impacts

1. Environment, climate change, biodiversity
   - Afforestation and reforestation in nearly 3 million ha, improved forestry function, diversified biodiversity activities and accelerated research activities
   - Integrated Eco/Environment awareness activities through Children’s Forest Program

2. Poverty alleviation
   - Community development and IG activities uplifted people’s socio-economic life

3. Women empowerment
   - Self Help Group (SHG) activities were implemented in all projects and IG activities and micro credit/finance are incorporated

4. Disaster prevention/water resource conservation
   - Ground water level and agriculture production were improved.

5. Utilizing Japanese knowledge
   - Implemented technical cooperation on capacity development
   - Promoted collaboration with local governments (Akita, Oita and Okinawa)
Example of Visible Impacts in Afforestation:
Tamil Nadu Afforestation Project

Uttar Pradesh Participatory Forest Management and Poverty Alleviation Project
Satellite picture (Majholi)
2012 2016

Actual picture (Majholi)
2012 2016
10. Human Resource Development
Human Resource Development under the Technical Cooperation

Technical cooperation for "capacity development" includes the training of Indian officials and the dispatch of JICA experts.

<table>

Champions for Societal Manufacturing (CSM) Project
[Technical cooperation/Ongoing]

1. National Integrated Human Resource Development Program in Manufacturing by **Fostering Visionary Leaders** through five(5) courses

   - Course for Senior Manager Level
   - Course for SMEs (Vendors of OEMs & Tier 1-2)
   - Course for Middle Management Level
   - Course for CEOs
   - Course for Village Development and new business development

2. Implementation in collaboration with Government, Industry and Academia

   Prof. Shiba, the JICA expert, was conferred decorations both in India and Japan. Over 5000 CEOs and senior/middle-level managers have participated the programme.
Under CSM

“Godrej Edge Digi, Direct Cool Refrigerator Range” won **India Design Mark (2014)** and **Japan Good Design Award (2015)**

- localized to the Indian market (Larger Vegetable Space, Larger Shelf Space, Larger Freezer Space, Larger Space for big water bottles)
- the graphic on its exterior shows a strong awareness for the Indian cultural sphere.
- the lowest energy consumption in India
- 24 hour cooling retention despite power cut with StayCool Technology
- the anti-bacterial property of Silver ions

The members of its design and production team are the training module director and demonstrators of JICA CSM Training course.
11. Women Empowerment
### Women Empowerment

Addressing women empowerment through gender mainstreaming approach in various projects for Inclusive Development

| Transport (Metro)     | • Delhi Mass Rapid Transport System Project (Loan)                                                                                                                                                              | • Coach for women only was introduced.                                                        |
Women Empowerment

**Grassroots activity**
(Through the volunteer approach, support primary health care and youth activities)

**Twinning NGO partnership**
(Empowering girls and women through NGO supported activities)

**Technical training in Japan**
(Improvement of reproductive and maternal health by enhancing capacity of medical professionals)

**BOP Business program**
(Strengthening nutrition through supplementary food for children and women, Sanitary products for women in rural area)
Women Empowerment – Way forward

Gender Mainstreaming across the sectors in India
12. Business Environment Improvement
TNIPP (Tamil Nadu Investment Promotion Program)

◆ Program Description:
- To further improve the investment climate through strengthening the policy framework and developing urban infrastructure such as roads, power, water and sanitation, thereby attempting to increase foreign direct investments in the state for sustainable growth.
- Government of Tamil Nadu and JICA jointly monitor progress of action plans in the agreed policy matrix. Based on achievement, JICA disburses the loan amount by dividing into three tranches (corresponding to each fiscal year action plan).

◆ Loan Amount and Disbursement:
- JPY 13 billion (≒ Rs. 650 crore)
  (7 billion for 1st tranche and 3 billion for 2nd & 3rd tranche)

◆ Program Duration:
- 3 years (FY2012/13 - 2015/16)

◆ Achievement:
- A comprehensive action plan for ease of doing business has been elaborated.
- Global Investors Meet was held in September 2015.
- Development of industry related infrastructure (e.g. sub-station, road, water supply) has been accelerated.

After the success of TNIPP, TNIPP Phase 2 (Mar. 2017) and GIPP (Sep. 2017-Gujarat) were signed → next page
