JICA's 3 Pillars for SDGs

JICA's strategy towards SDGs

Ultimate Goals

Utilizing Japan's Experience

Innovations and Partnerships

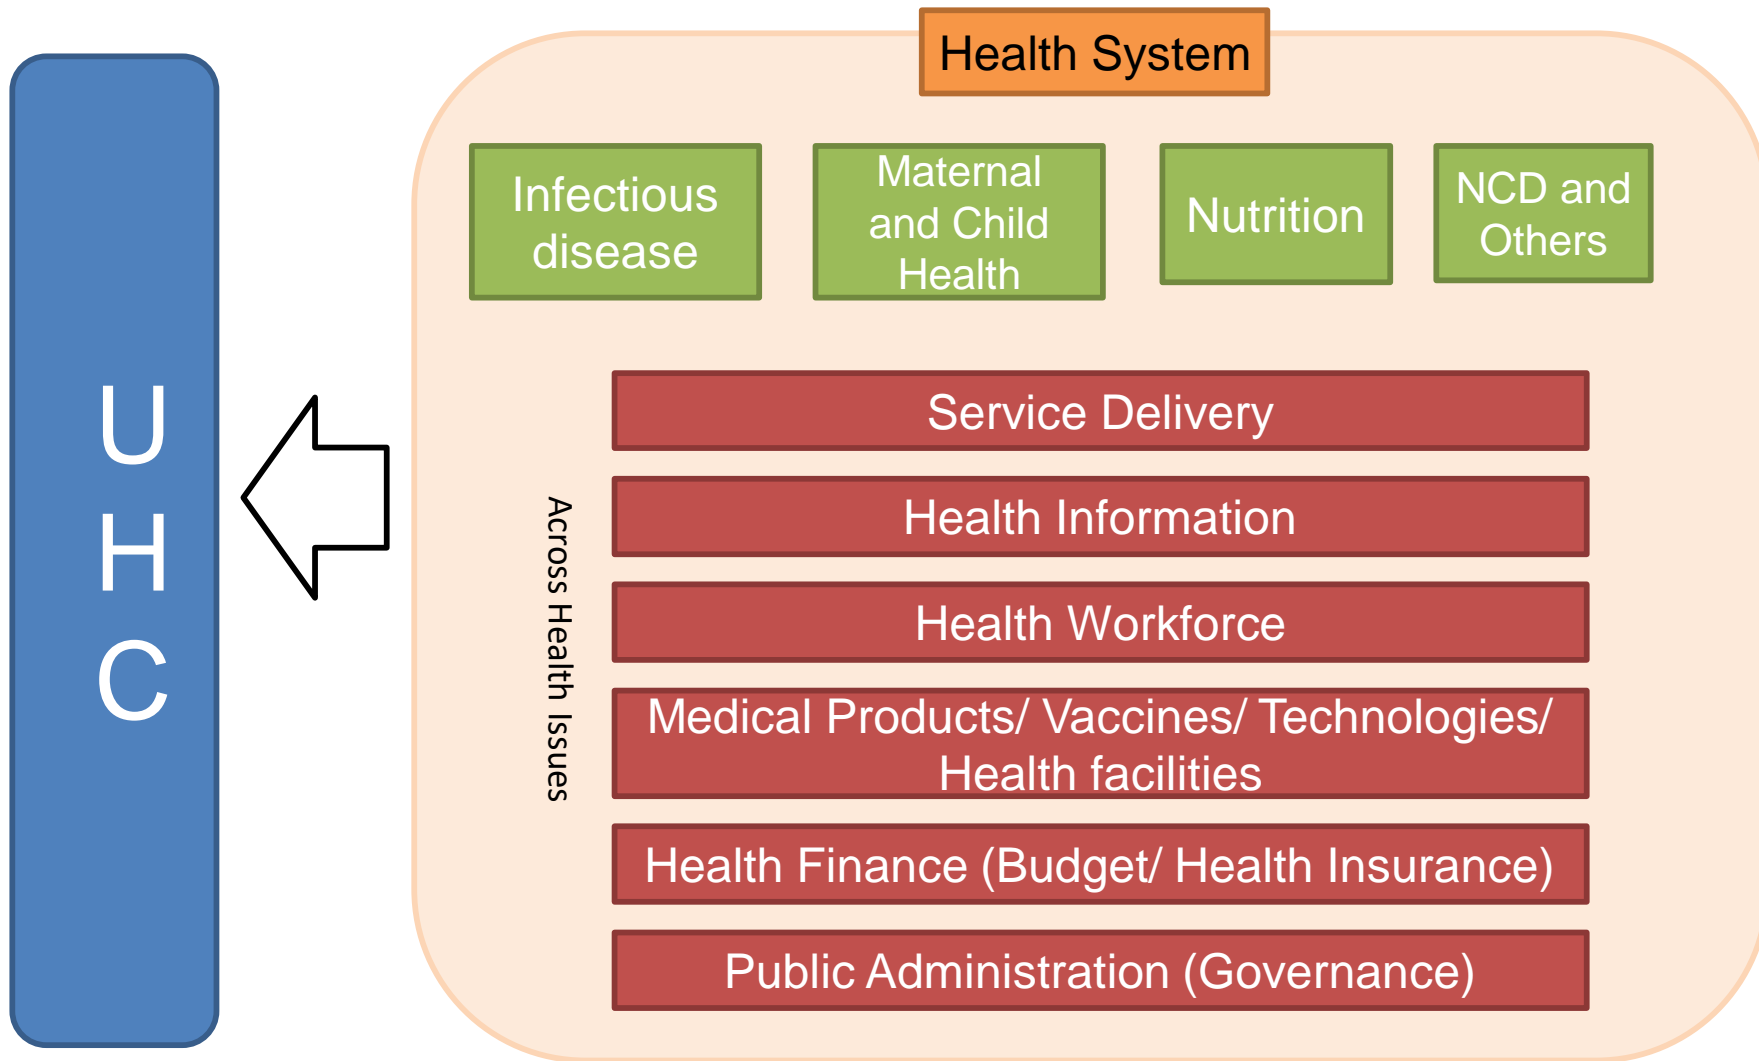

Key Priorities

Health System Strengthening

Maternal and Child Health, Infection Diseases Control with focus on horizontal dimension

New Challenge: Non-Communicable Diseases

JICA's Strategy in Health Sector

3 GOOD HEALTH AND WELL-BEING

Home-based records for maternal, new-born and child health (Boshi-Techo)

Mothers are not well-informed on child health due to lack of communication between health providers and mothers/caregivers

- Boshi-Techo project has been carried out **more than 25 countries** such as Ghana, Vietnam and Philippine.
- **10 million record books** have been distributed every year, improving care-seeking behaviours, maternal and child home care practices by establishing a good communication between health providers and women/caregivers

3 GOOD HEALTH AND WELL-BEING

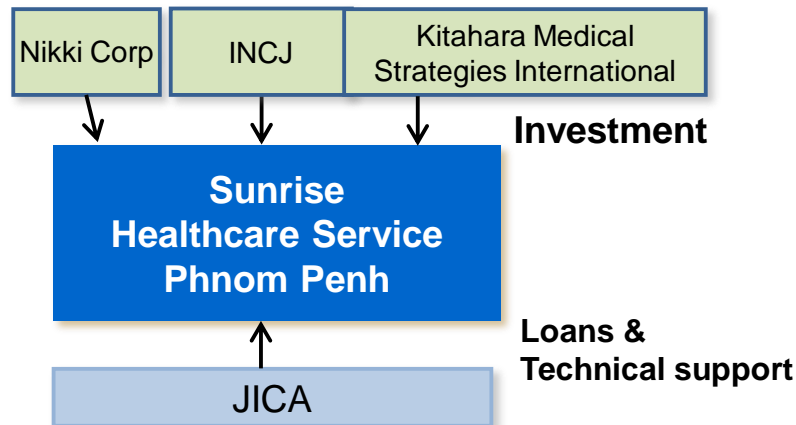

Advanced health services in Cambodia to ensure healthy lives for all at all ages

Lifestyle diseases such as strokes and traffic accident injuries are increasing in Asia along with the rapid economic growth

The Emergency Life Saving Center Development Project launched in Cambodia with Japanese private companies under the JICA's Private-Sector Investment Finance scheme

Contribution by JICA in Health Sector

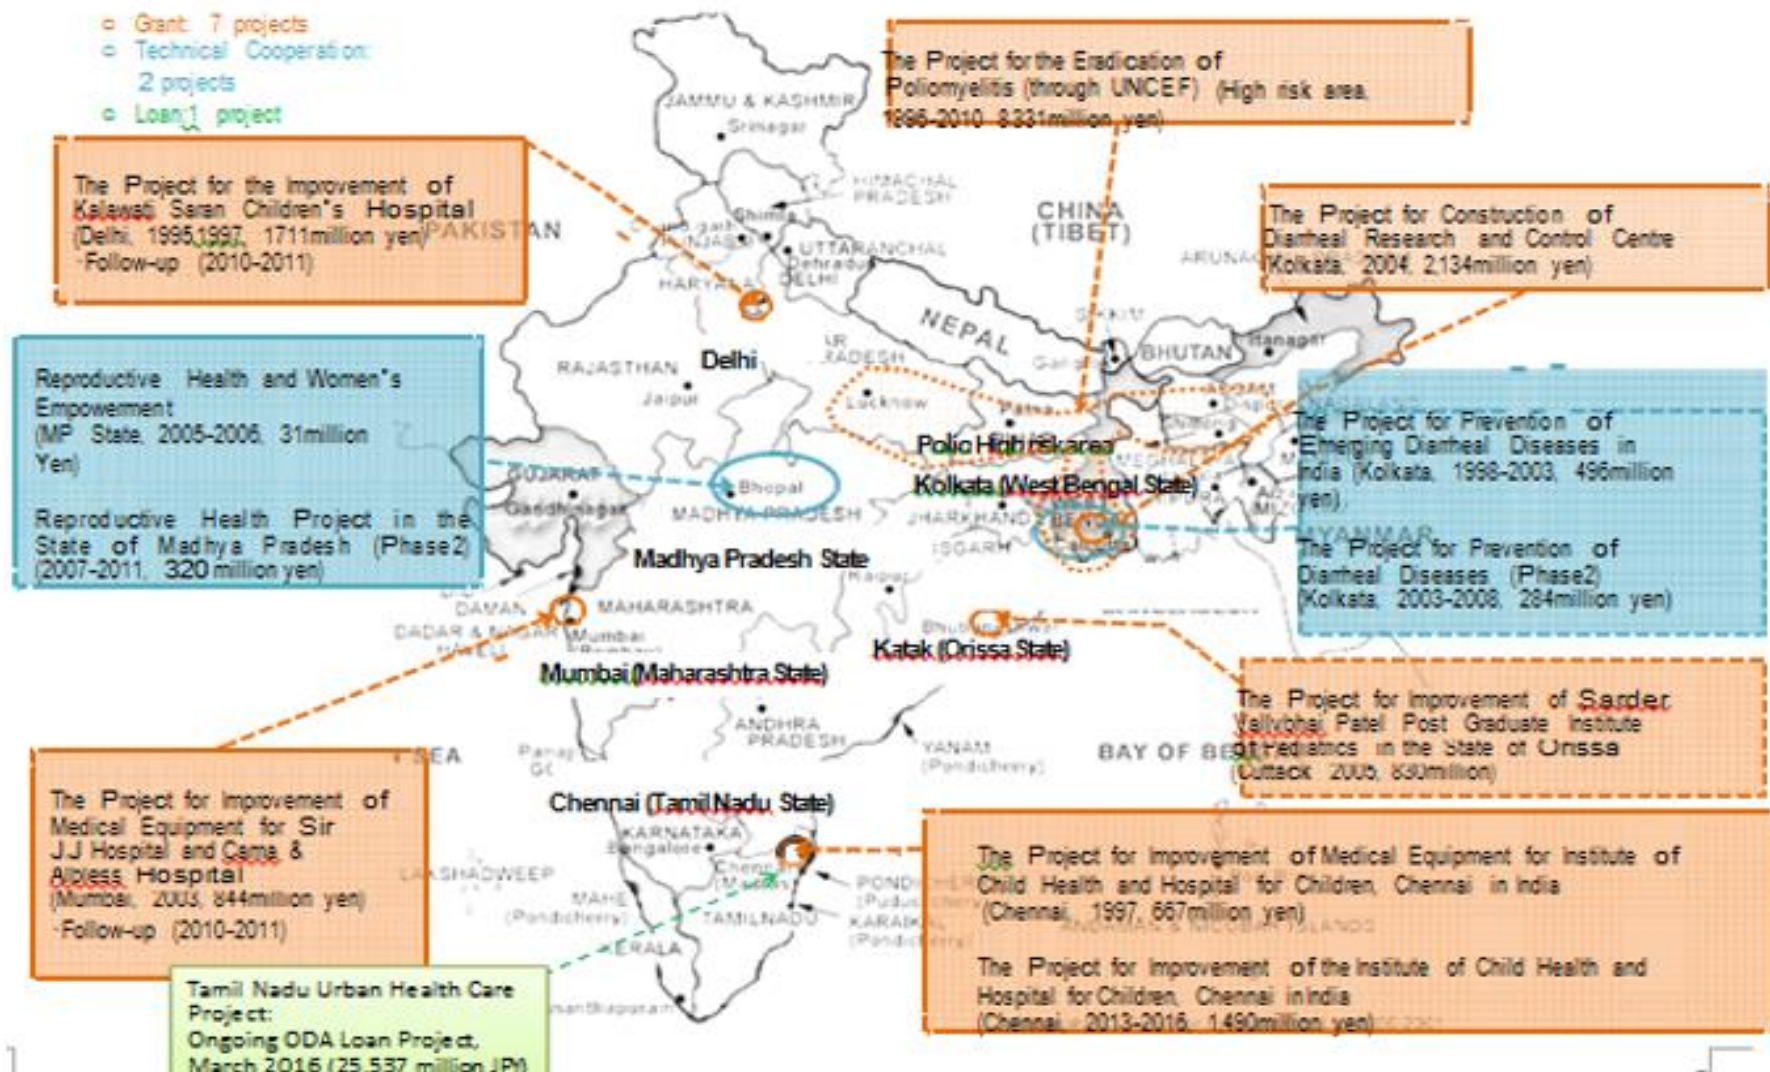

Contributed in
infection
disease control

Enhanced
accessibility for
the poor

Families are
well-informed
in health

Concept of the
hospital
management

JICA's Health Projects – As of Present

Institute of Child Health and Hospital in Chennai (Grant) 2016

Collaboration with UNICEF in Polio eradication

Tamil Nadu Urban Health Care Project

Project Profile:

Loan Agreement : 31st March 2016

Total project Cost: Rs. 1633.75 Crs

Loan Amount: Rs. 1387.88 Crs

Project period: April 2016 –March 2023

Project site

- Tertiary
- Secondary & Tertiary
- Secondary

Primary capacity building

Project Outline

Goal:

To improve the Health Care of the Population living in the urban areas of Tamil Nadu

Contribution for 'Universal Health Coverage' in Tamil Nadu

Objective:

- Strengthening the capacity of key hospitals with up gradation of facility and equipment.
- Reinforcing the capacity of human resource, thereby to contribute for coping with increasing demand for Non-communicable disease (NCD) prevention and control.

Lessons from past

- ✓ Hospital management
- ✓ User friendly facility
- ✓ Quality maintenance
- ✓ Capacity building & awareness
- ✓ Health system strengthened
- ✓ Community based quality institution

Hospital design workshop in Tamil Nadu

Collaboration with UNICEF in Polio eradication

Gender equality in Health

- Address women's specific health needs such as maternal health
- Improve accessibility to health services, particularly maternal/children hospitals
- Strengthened the capacity of the health personnel such as nurses, ANMs.

Reproductive Health Project in Madhya Pradesh 2007-2011

Quality health services for mothers and new born babies by strengthening the capacity of the ANMs.

Thank you
