

Overview of Japanese Support for Earthquake Recovery in Nepal

26 April 2019

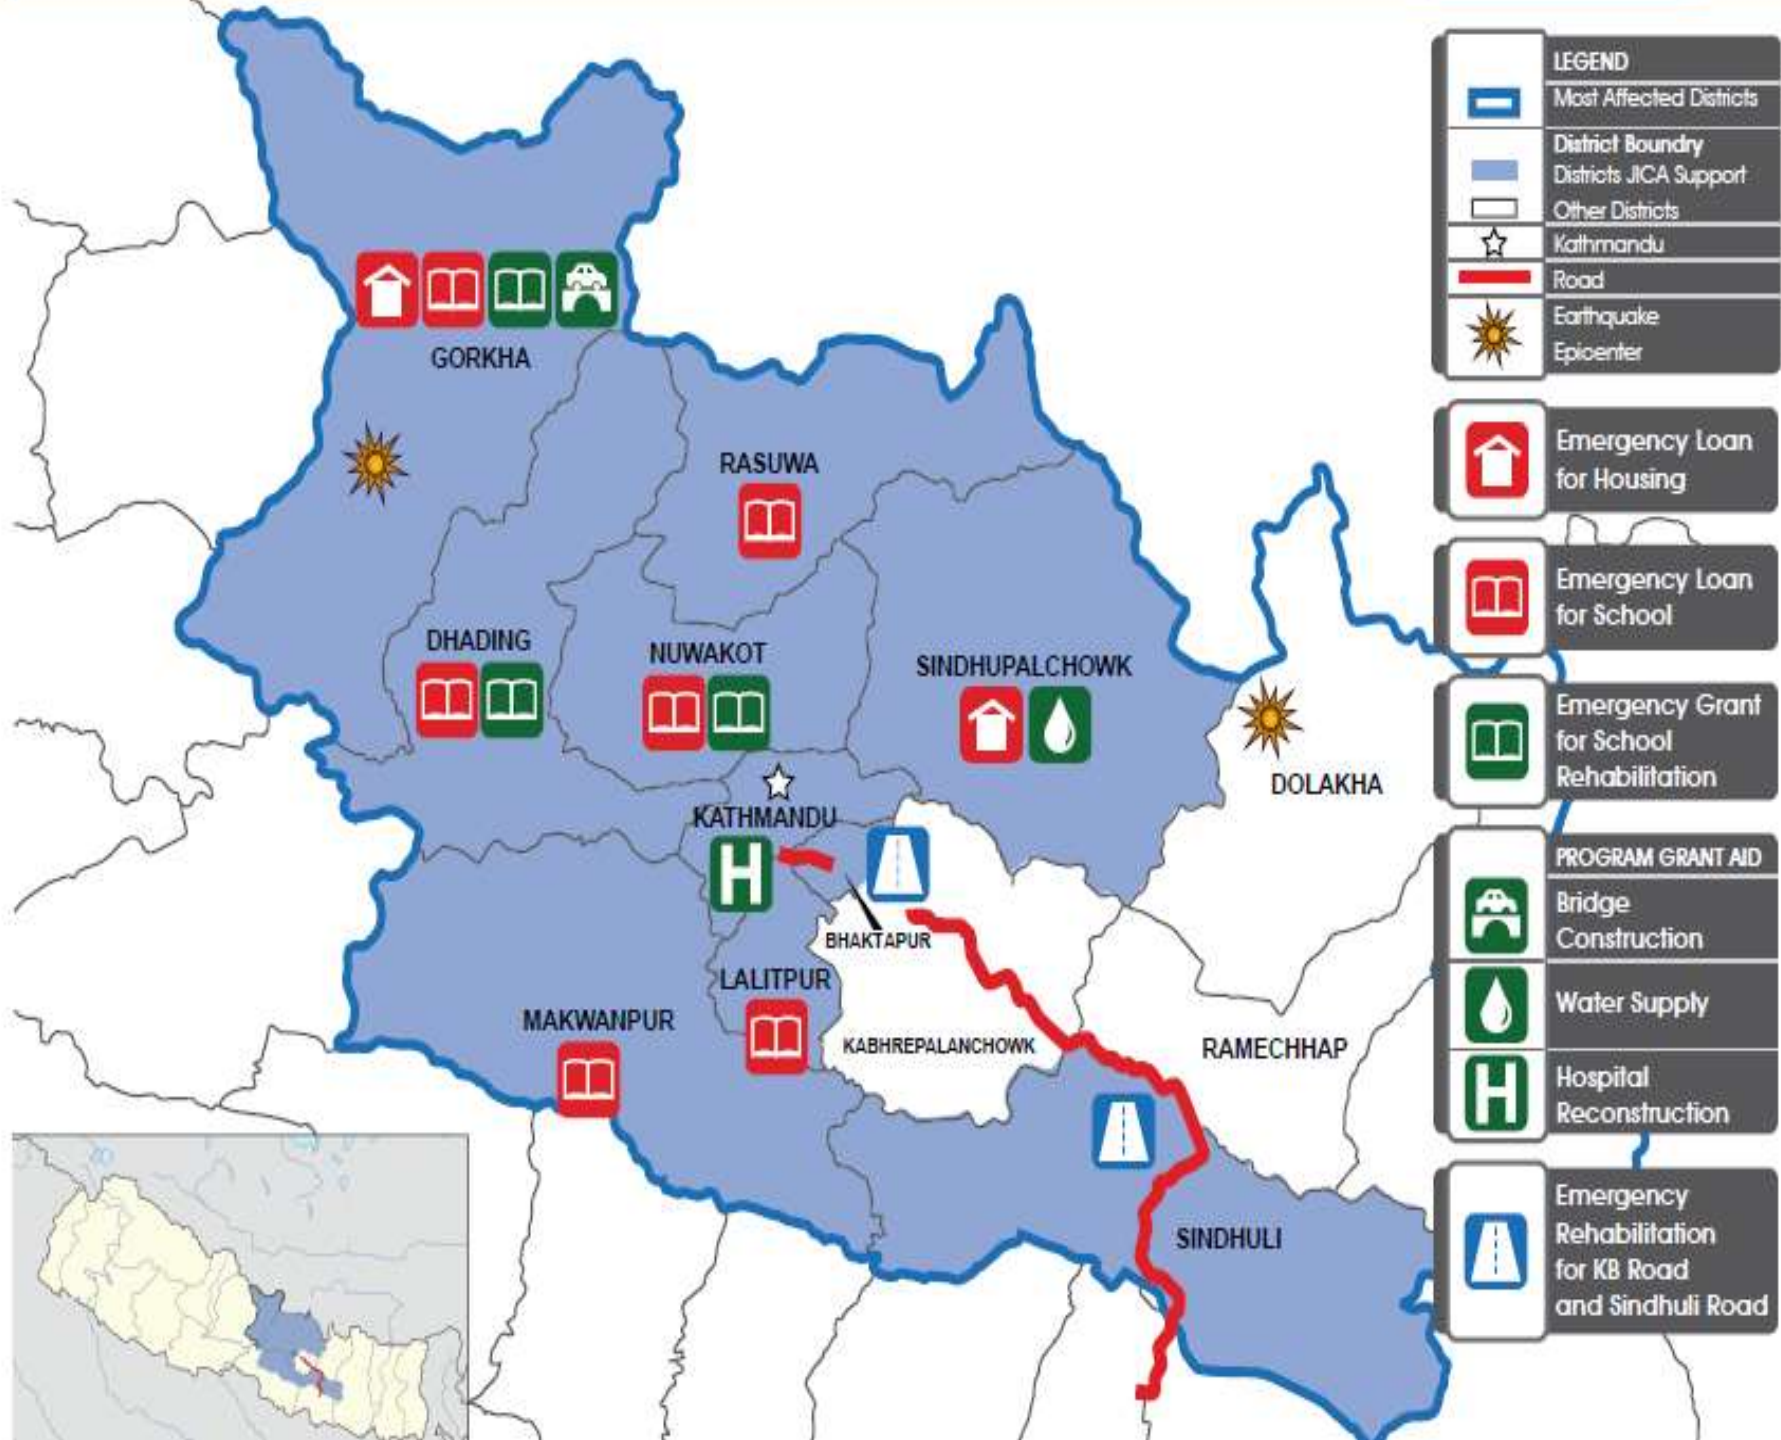

**Dr. Kozo Nagami
JICA Nepal**

Our Support for EQ Recovery

Based on the ***Build Back Better (BBB)*** concept, a wide range of support has been provided since immediately after the earthquake in April 2015.

- Housing Reconstruction (EHRP)
- School Reconstruction (ESRP)
- Rebuilding Public Facilities & Infrastructure (RRNE, GA)
- Rehabilitation of Cultural Heritage (HER)
- Livelihood Recovery in the Affected Communities (RRNE)
- District-Level Recovery & Resilience Planning (RRNE, ERAKV)

Principles for Achieving BBB

- **Official Definition** (<https://www.unisdr.org/we/inform/terminology>)

increase resilience and reduce disaster risk

- **Disaster Risk Reduction**

To reduce risk, we can only reduce vulnerability.

World Risk Index 2018

| | World Risk Index 2018 | Exposure (Hazard) | Vulnerability |
|-------------|-----------------------|-------------------|-------------------------------------|
| | 7.475711047 | 15.77668605 | 46.23186047 ← World Average |
| Nepal | 5.44 | 9.53 | 57.1 ← Score (bigger worse) |
| | 104 | 137 | 50 ← Rank among 172 (bigger better) |
| India | 6.83 | 12.47 | 54.78 |
| | 75 | 93 | 55 |
| Bangladesh | 17.38 | 29.95 | 58.03 |
| | 9 | 16 | 47 |
| Afghanistan | 10.45 | 15.48 | 67.53 |
| | 35 | 57 | 18 |
| Bhutan | 7.56 | 15.48 | 48.82 |
| | 62 | 57 | 68 |
| Pakistan | 6.11 | 10.7 | 57.11 |
| | 89 | 118 | 49 |
| Sri Lanka | 7.65 | 16.01 | 47.81 |
| | 61 | 50 | 71 |
| Japan | 11.08 | 46.55 | 23.81 |
| | 29 | 5 | 165 |

uncontrollable

Max. vulnerability = 100 %,
Classification according to the

Sectoral Breakdown of Vulnerability

JICA reduces the existing vulnerability with approaching dynamically from diverse sectors.

HOUSING RECONSTRUCTION

Project Outline

Emergency Housing Reconstruction Project (EHRP)

Project purpose:

To restore and improve the living condition of the victims of the Nepal earthquake by reconstructing the destroyed and damaged houses with an adequate seismic standard in the districts severely affected by the Nepal earthquake.

Finance (Untied loan to GoN)

- JPY 12,000 Million (approx. 108 Million USD)
- Annual interest rate:0.01%
- Repayment period: 40 years including 10 year grace period

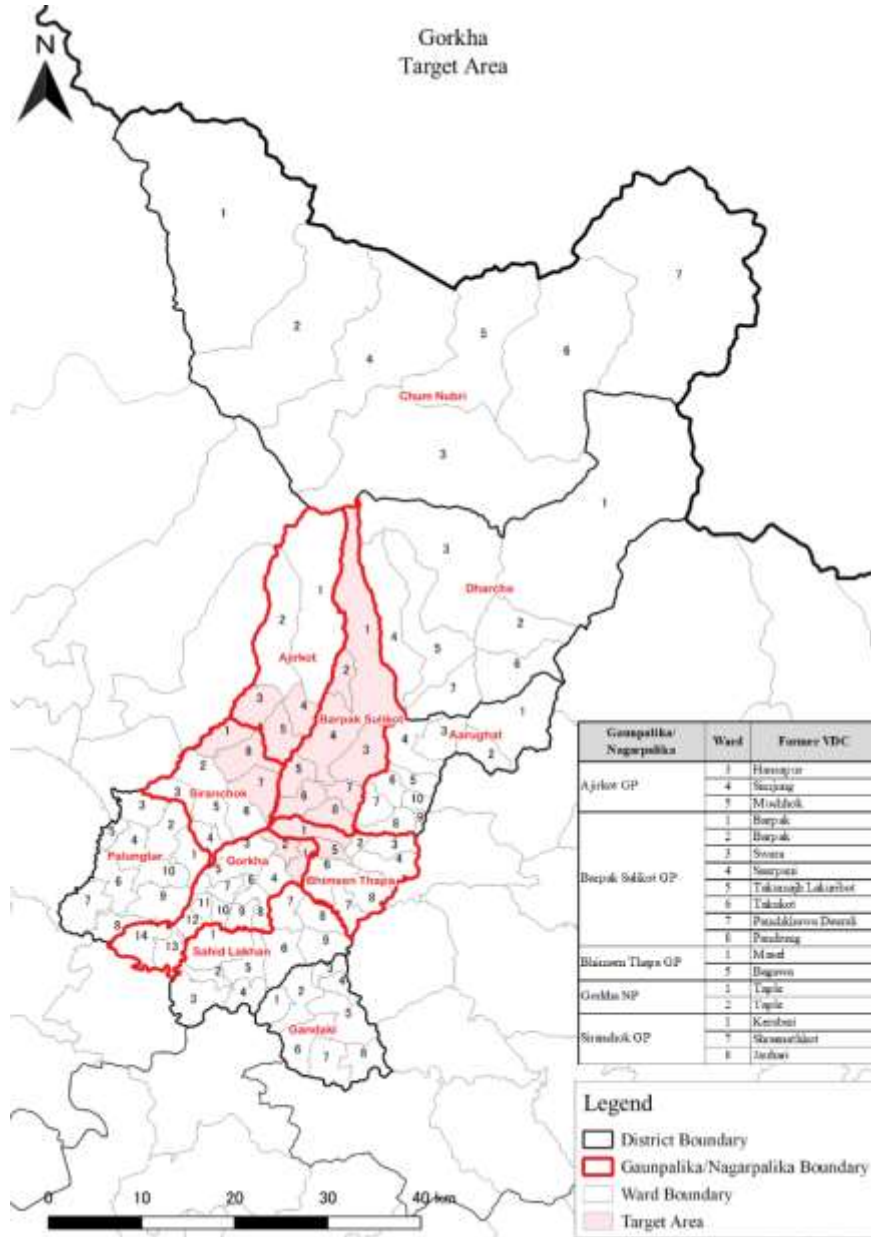

Scope of Loan:

- Housing Reconstruction
- Consulting Service

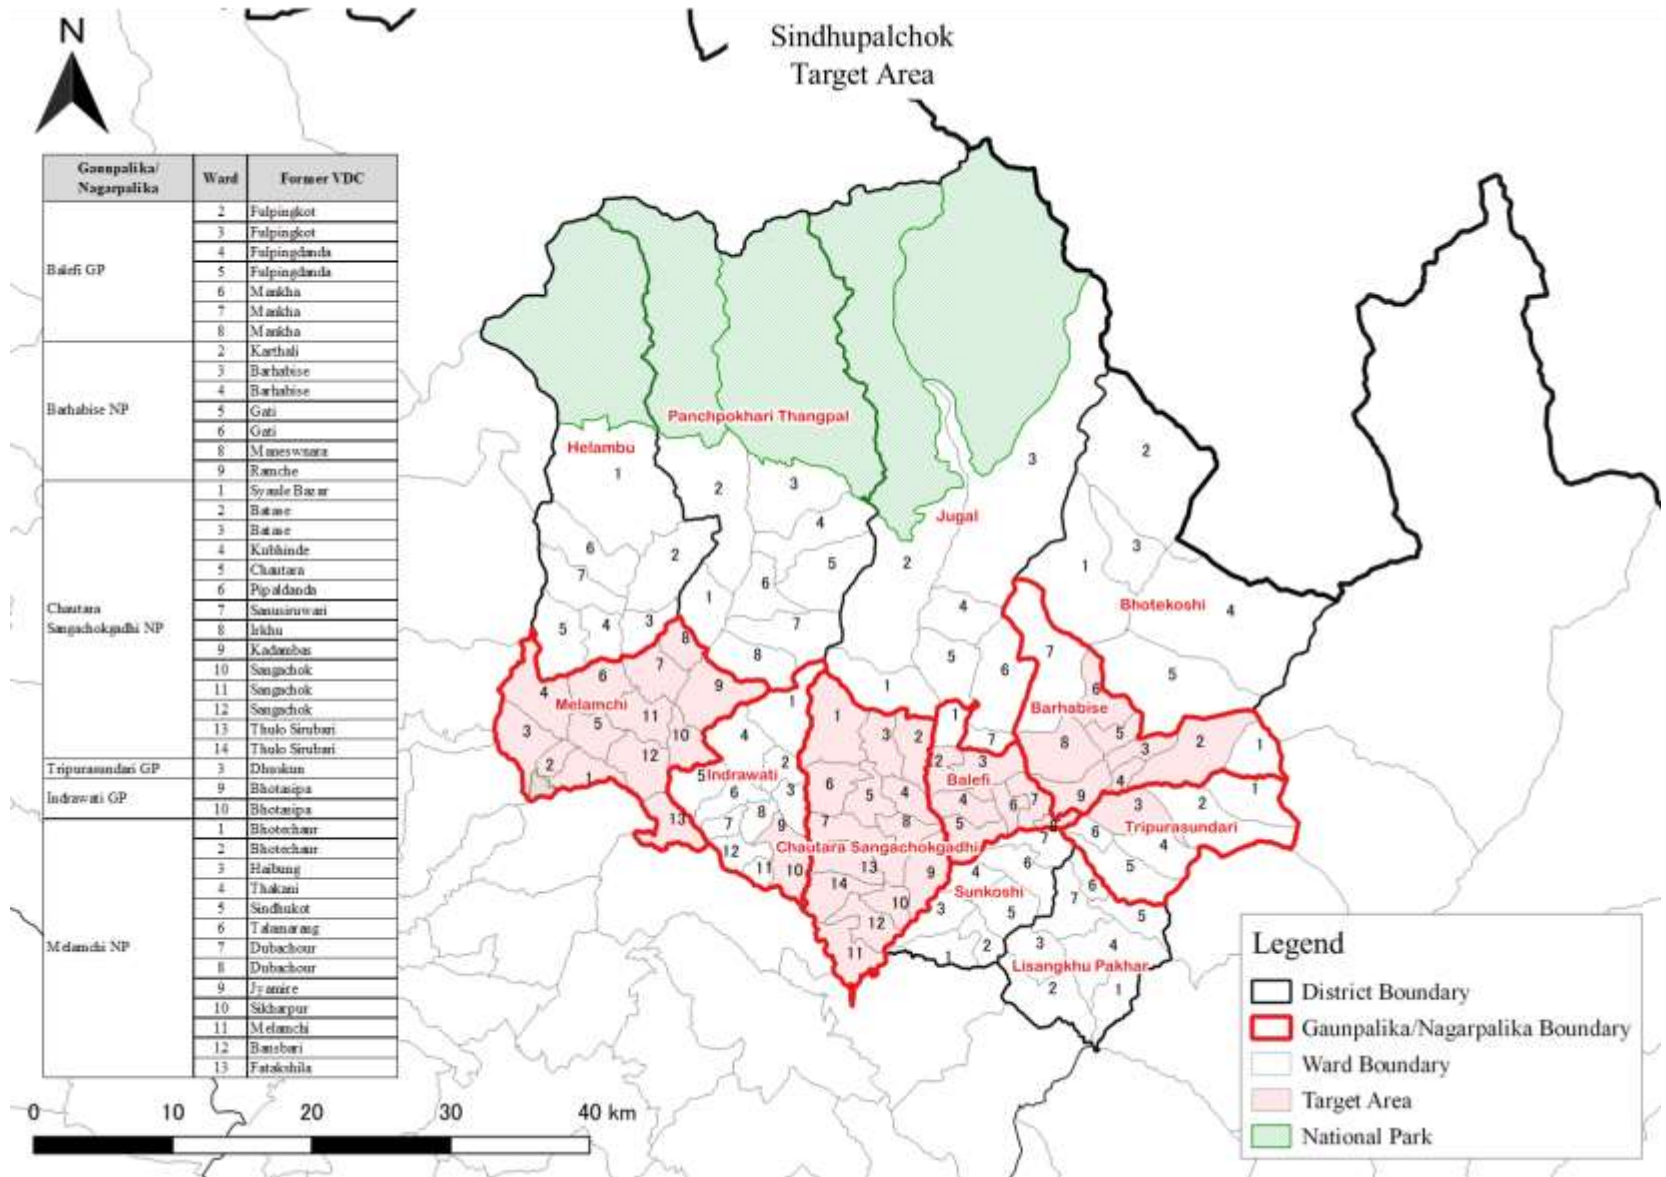

Modality:

- Design & Supervision Consultant by Oriental Consultant Global

Target Area in Gorkha

Target Area in Sindhupalchok

Minimum Requirements

NRA organized the TSC (Technical Standardization Committee) in Feb 2016. In this committee, it was discussed whether NBC105 should be applied to residential buildings in the reconstruction programme as the seismic requirement. Then the minimum requirements for residential buildings were developed, and brochures were distributed.

Reconstruction Progress

Overall Housing Reconstruction Status- As of March, 2019

Reconstruction Progress (as of March 2019)

| | Gorkha | Sindhupalchowk | Total |
|----------------------------------|-------------------|-------------------|--------------------------|
| Identified Beneficiaries | 15,216 | 41,490 | 56,706 |
| PA signing | 14,860 (97.7%) | 40,862 (98.5%) | 55,722 (98.3%) |
| Construction Started | 14,440 (94.9%) | 39,660 (95.6%) | 54,100 (95.4%) |
| 1 st Tranche Received | 14,773 (97.1%) | 40,686 (98.1%) | 55,459 (97.8%) |
| 2 nd Tranche Received | 14,217 (93.4%) | 38,524 (92.9%) | 52,741 (93.0%) |
| 3 rd Tranche Received | 12,929 (85.0%) | 31,706 (76.4%) | 44,635 (78.7%) |
| Completion of Reconstruction | 13,154 (86.4%) | 32,850 (79.2%) | 46,004 (81.1%) |

Completed Houses

Completed Houses

Completed Houses

SCHOOL RECONSTRUCTION

Emergency School Reconstruction Project (ESRP)

Project purpose

To rebuild and retrofit schools in the districts severely affected by the Gorkha EQ

Finance (Untied loan to GoN)

- JPY 14,000 Million (approx. 126 Million USD)
- Annual interest rate: 0.01%
- Repayment period: 40 years including 10 year grace period

Scope of Loan

- Civil Works and Procurement of Equipment
- Consulting Service

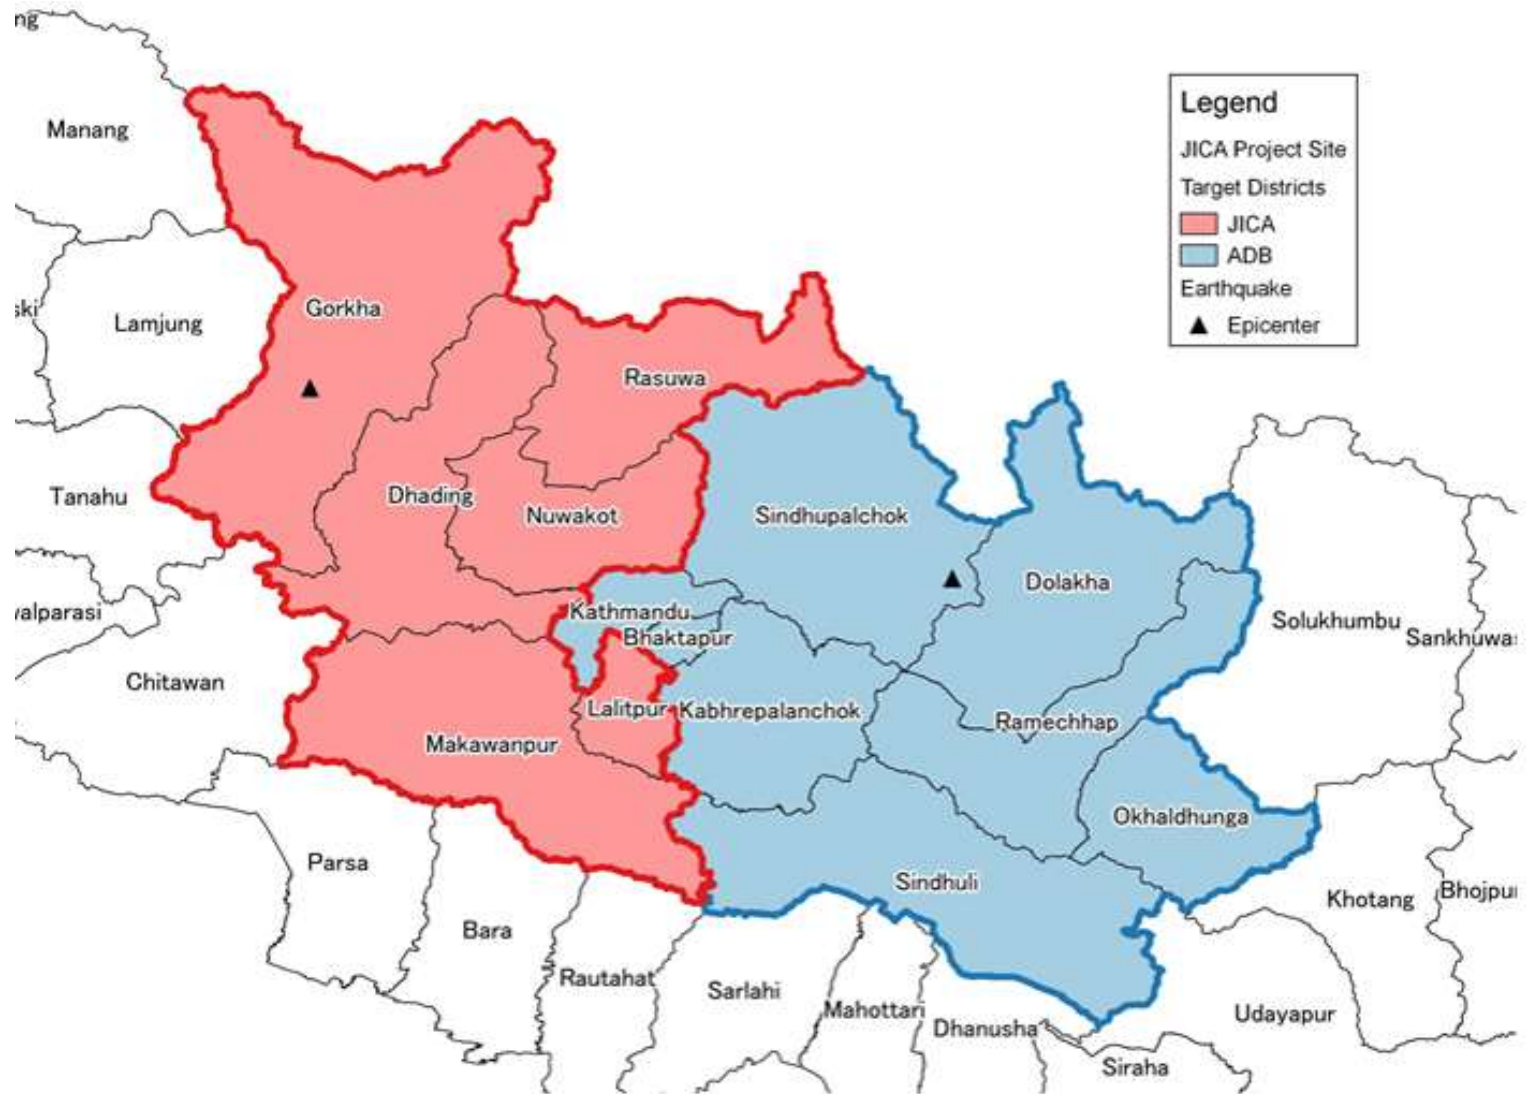

Modality

- Construction work by Local Contractors under National Competitive Bidding
- Design & Supervision Consultant by Oriental Consultant Global

Target Area

6 Districts supported by JICA:

- 1) Lalitpur
- 2) Makwanpur
- 3) Dhading
- 4) Nuwakot
- 5) Rasuwa
- 6) Gorkha

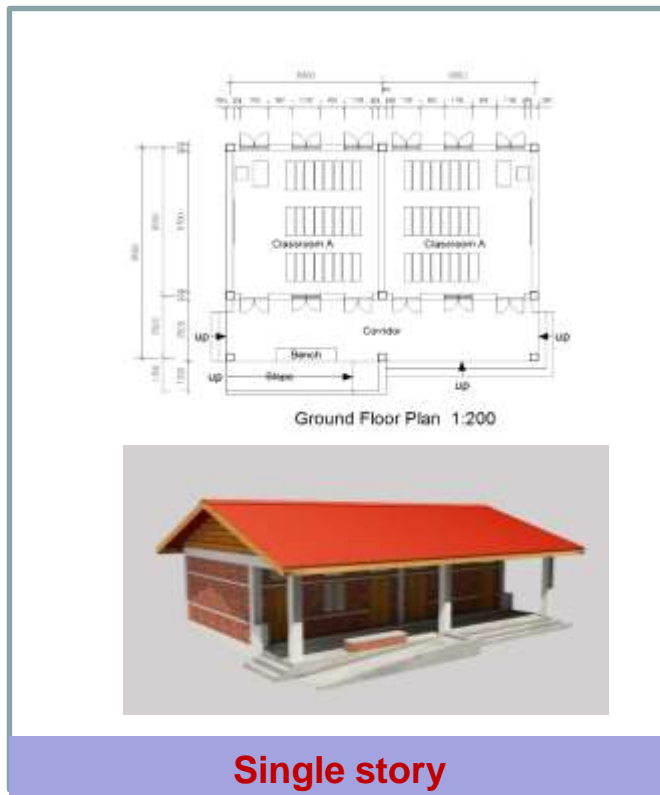

Seismic Resistant Building Guidelines of School

- ESRP is being implemented by JICA together with NRA/CLPIU(Education) based on the guideline which was jointly created by ADB and JICA.
- The guideline consists of two volumes:
 - **Guidelines for Developing Type Designs for School Buildings in Nepal**, which focuses on architectural, mechanical and electrical criteria
 - **Structural Design Criteria for Type Design of School Buildings**, which mentions structural criteria

Type Design

- Some new prototypes were designed at the beginning and after that the number was increased based on the demands.
- A total of 37 new prototypes were designed in order to cover kindergartens, primary schools, lower secondary schools, secondary schools, and higher secondary schools.
- **153** Type Design approved (2 schools in Lalitpur has special Type Design)

Progress Status (by Districts)

- **A total of 236** Schools were selected.
- Largely secondary/bigger schools under the concept of ‘**complete school**’.
- Implementation in three batches
 - **Batch 1: 78** schools (From June 2016)
 - **Batch 2: 27** schools (From August 2017)
 - **Batch 3: 131** schools (From May 2018)
- All procurement was completed in 2018.

Coverage (as of 31 March 2019)

| District | Target Schools | Completed Schools |
|--------------------------|--------------------|-------------------|
| Lalitpur | 21 | 7 |
| Gorkha | 61 | 18 |
| Makwanpur | 41 | 7 |
| Dhading | 49 | 3 |
| Rasuwa | 7 | 1 |
| Nuwakot | 57 | 11 |
| Total 6 districts | 236 schools | 47 schools |

Shree Bal Kalyan LSS, Chyangli, Gorkha

Shree Dharmodaya SS, Mirkot, Gorkha

Shree Awagaman Primary School, Salyantar, Dhading

Shree Udaykharka SS, Bajrabarahi, Lalitpur

PUBLIC FACILITIES & INFRASTRUCTURE

Key Approaches for Reconstruction

- Improved structural design for earthquake resilience

Foundation beams

Foundation beams

Set rebar here

Rebar in hollow block walls

Simplification of rebar alignment

- Quality control & on-the-job training
- Safety management & training

Kathmandu & Lalitpur

Paropakar Maternity and Women's Hospital
(in Kathmandu)

Bir Hospital (in Kathmandu)

Disaster Management Park
(in Lalitpur)

CULTURAL HERITAGE

Support for Cultural Heritage Restoration

- Dispatch of Japanese Experts to the Department of Archeology on Heritage Restoration Technique
- Rehabilitation will be implemented together with local communities
- For supporting rehabilitation of 3 temples in Kathmandu and Lalitpur

- Aganche Temple (Kathmandu Durbar Square)
- Shiva Temple (Kathmandu Durbar Square)
- Degu Talle Temple (Patan Durbar Square)

LIVELIHOOD RECOVERY

Livelihood Recovery Support

Key Concept

- Recover Conventional Livelihoods in a Sustainable Manner
- Active Women Involvement in Rehabilitation and Recovery

Main Activities

- Improved vegetable farming for women's groups
- Improved maize farming practices
- Quality seed production and seed storage construction
- Improved goat farming
- Establishment and enhancement of a women's cooperative

Target Beneficiaries

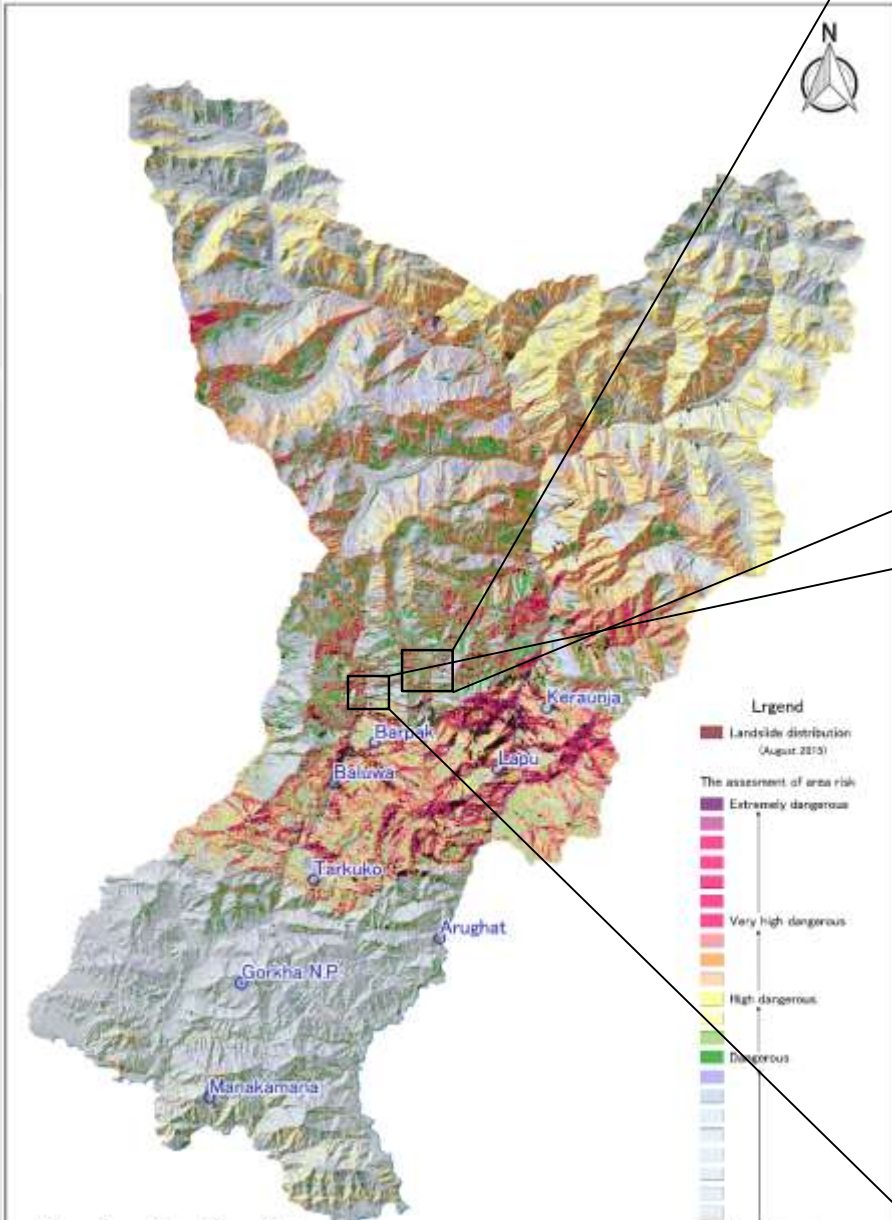

- Over 1,500 people in Gorkha and Sindhupalchowk
- About 80% are women

RECOVERY & RESILIENCE PLANNING

1. Hazard Maps

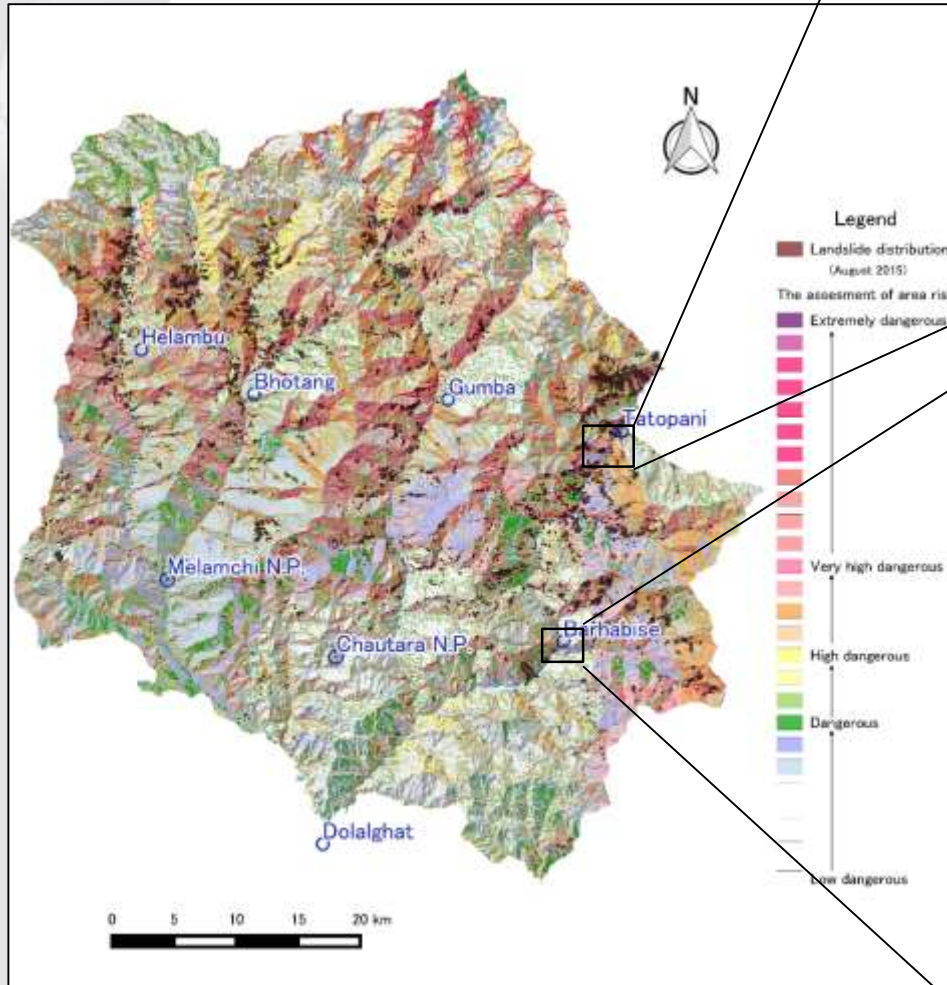

Enlargement of Hazard Map (Laparak)

Enlargement of Hazard Map (Barpak)

1. Hazard Maps

Enlargement of Hazard Map (Tatopani)

Enlargement of Hazard Map (Barhabise)

2. District Rehabilitation and Recovery Plan

Planning Period : 2016- 2026 (10 years)

Basic Policy

■ Recovery of Daily Lives

Housing Reconstruction, Restoration of Public Services (Administration, Health, Education and Social Welfare), Livelihood Restoration of Vulnerable population

■ Building Resilient District Structure

Utilization of Hazard Map, Restoration of Resilient Infrastructure, Establishment of DRR System

■ Recovery and Development of Regional Economy

Restoration of Agriculture, Restoration of Tourism, Restoration of Cottage and Small Industries

Formulation Process

- Consultative workshops (2016-17)
- Aligned with PDDP formulation
- DDC/DCC approved RRP's and distributed to municipalities

2. District Rehabilitation and Recovery Plan

Gorkha District's Recovery Vision

***“Beautiful, Equitable and Prosperous
Gorkha through Agriculture, Tourism and
Resilient Infrastructure”***

Sindhupalchowk District's Recovery Vision

***“Safe, Prosperous and
Beautiful Sindhupalchowk”***

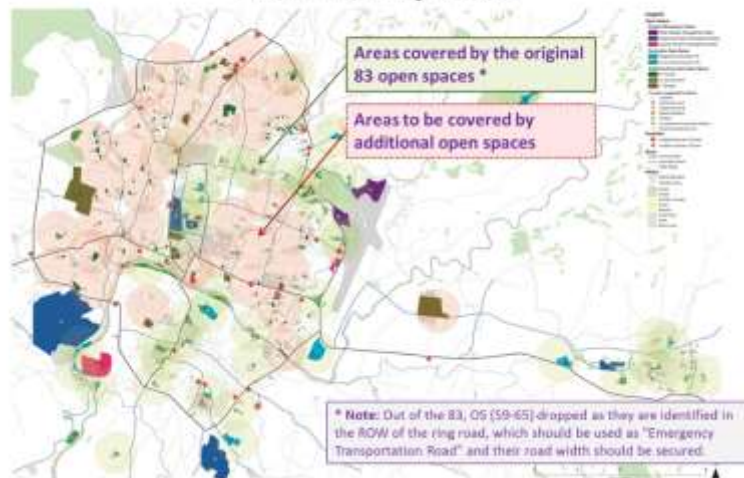

3. Kathmandu Valley Resilience Plan (KVRP)

Importance of KVRP

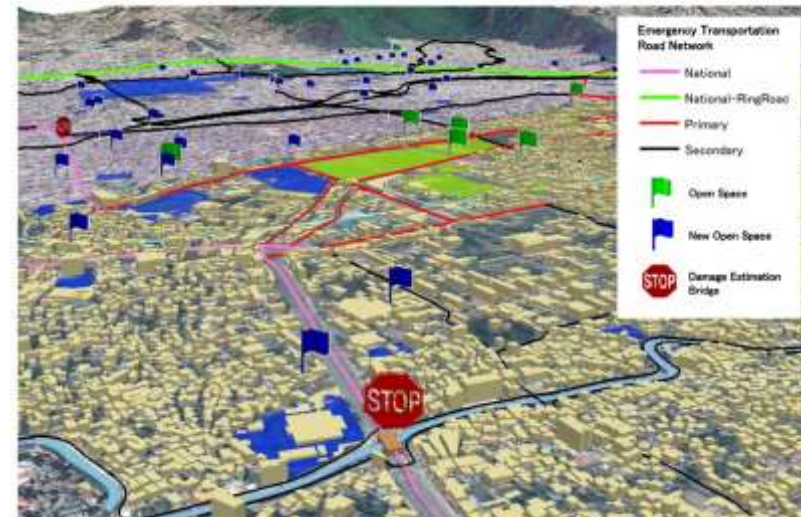

- Nepal is one of the most vulnerable countries to natural disasters, including large-scale earthquakes.
- The Kathmandu Valley is the political, economic and cultural center of the country.
- If the scenario earthquake hit the Kathmandu Valley, significant damages will occur.

➔ A long-term (20 yrs), multi-sectoral plan for building resilience against future earthquakes
