# Normal RFID tag uses

Normal RFID tag

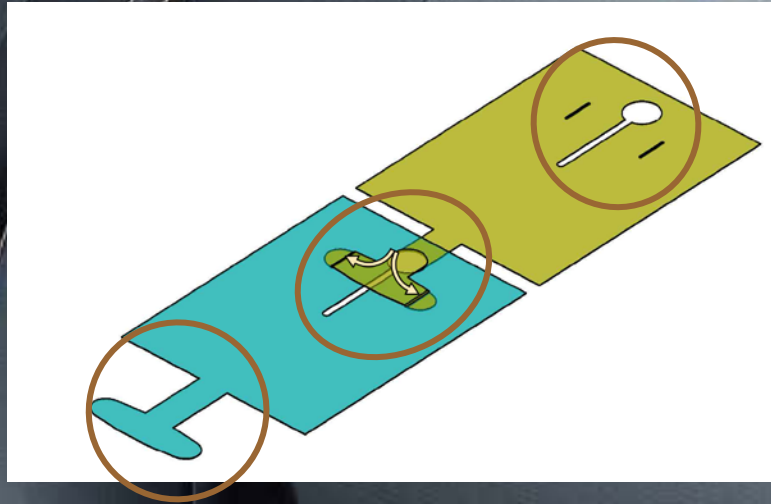

RFID tag printer

The background features a dark, textured surface with a grid pattern. On the left side, there are several concentric, overlapping circular shapes that create a sense of depth and movement. The text is centered over these shapes.

# RFID Reusable case

# Model of our product

# Easy Steps to Re-Encode

1. Collect used tags

2. Link all used tags  
together like a chain

3. Roll into a coiled shape

4. Put in your  
Encoding Device

# Re-Encode by simple Encoding devices

RFID tag cost + Case cost

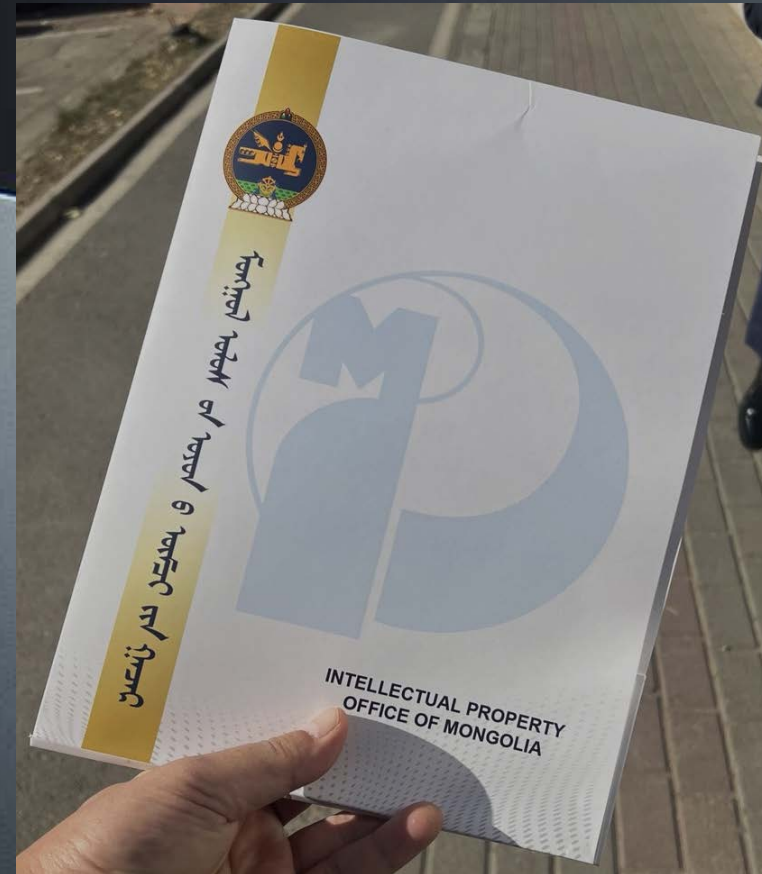

---

100 to 1000

50-500 times Cost saving

Our innovation is possible for  
reuse 100 to 1000 times RFID tag  
case and easy to encode

Our mission is to  
distribute recycled  
RFID reusable case  
to reduce costs and  
waste in line with  
the UN's Sustainable  
Development Goals

Patent rental  
revenue 1 billion  
USD per year  
From all items  
uses by Human

Let's **Recycle** 400,000  
tons of waste every year,  
100 times **Reduce** RFID  
tag costs, and **Reuse** RFID  
Reusable cases for a more  
sustainable future.

Thank you for your  
attention!
