#### Russia's Engagement with SDGs

- Russia welcomes the adoption of the new 2030 Agenda for Development.
- Poverty eradication is the key objective of Russia's state policy in the area of international development assistance. Debt relief is an effective tool in this regard. Under the Heavily Indebted Poor Countries (HIPCs) Initiative, Russia has written off over US\$ 20 billion of the principal debt owed by African countries alone. Russia also contributes to reducing the debt burden of the poorest countries beyond HIPC through debt-for-aid swaps.
- Russia has been funding and implementing aid projects on education, healthcare, energy, food security and infrastructure. The overall ODA surpassed US\$ 875 million.

# Three pillar of JICA's cooperation toward achieving the SDGs

1

JICA will realize "human security" and "quality growth" to contribute to the peace, stability and prosperity of the international community. The SDGs accelerates and promotes this cooperation philosophy so that JICA will proactively contribute to achieving the goals with leadership.

2

JICA will play a pivotal role in achieving **10 goals** of the SDGs making use of its own experience in Japan's socio-economic development as well as in international development cooperation.

3

JICA will work to secure impact of cooperation on the SDGs through utilizing Japan's own knowledge, introducing innovations and collaborating with local and international partners in order to accelerate the achievement of the SDGs.
