

JICA Grassroots Technical Cooperation Project Achievement Report Meeting

Relocation and localization of environmental education-International cooperation in the midst of the corona environment

Online Webinar Project JICA

June 4, 2022

10.00 - 12.00 JST

Project outline

This seminar will promote the results of the JICA grassroots technical cooperation project, which has been implemented during April 2018-April 2022. This project aims to strengthen the implementation of an environmental education system centered on the river environment and waste in the Deli River for the community and school environment who are prospective environmental leaders. (EL). This project activity provides training to EL on the management of household waste and domestic wastewater in the pilot school area in order to reduce the pollution load in the Deli watershed.
