

Project Outline

- **Duration:** 2017 ~ 2022
- **Sector:** Road
- **Name of Counterpart Institution:** The National Road Administration(ANE)
- **Type of ODA:** Grand Aid
- **Total Cost:** 3,419 million Japanese Yen
- **Project Overview:**
 - This project is to secure smooth and safe connectivity at the road N380 (Sunate - Oasse) through reconstruction of bridges, Messalo-1 (45m)/ Messalo-3 (60m)/ Mapuede (45m), thereby contributing to facilitate the economy of Cabo Delgado and neighboring countries.

Development Issues / Background

- This project is to address designated Government Programs under a strategic objective of “Improve and expand infrastructure and transportation services”. It includes the main principles for policy implementation, such as sustainability, connectivity, accessibility, transitability and asset preservation. Aiming to accelerate surrounding area development, by enhancement of the road network and improvement of fundamental living conditions.

Expected Impact on Road Sector & Economy

- This project will develop the road network between the Center and the north of Mozambique, through the reconstruction of the target bridges, namely Messalo I, Messalo III and Mapuede, contributing to the boosting of the economy of Cabo Delgado Province. and from neighboring countries such as Tanzania and particularly improving access to Palma where natural gas development is in progress.
