

# Improved Parboiling Technology

## 1. What Improved Parboiling Technology is about

Flip explaining improved parboiling method

### Parboiling

#### *Summary of recommended parboiling method*

1. Wash paddy thoroughly with water before soaking.
2. Start soaking when temperature of mass of paddy and water is at 65 – 70 Degree Celsius.
3. Soak paddy for 8 hours.
4. Use a lid and a false bottom for steaming.
5. Spread steamed paddy, accumulated not more than 2cm, on clean concrete yard.
6. Turn over steamed paddy sometime during sun drying.
7. Stop drying at moisture contents of 12.5 – 13.0%.
8. Allow dried paddy to cool down over night.

April 2017

## 2. How effective the technology is?

- Quality of rice is improved, thus value is added
