

The Counterpart training in Japan Part2

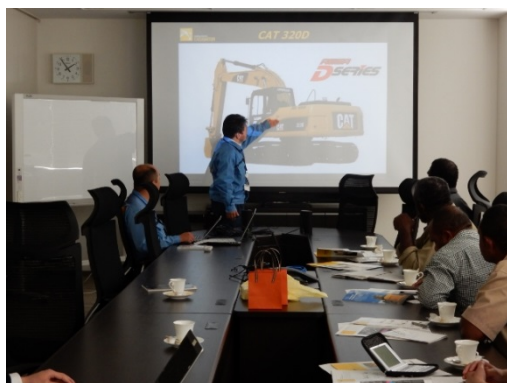

The trainees visited three heavy equipment manufacturing companies in Saitama prefecture and Hyogo prefecture. They saw the manufacturing process and deepened their knowledge of structure of heavy equipment. They also observed well organized working spaces in the factories and this will be expected to improve their working environment and process.

Sakai Heavy Industry, LTD.

KCM (Kawasaki Construction Machinery Corp)

Caterpillar Japan Ltd.

At the end of the two weeks training, the trainees summarized the training in the presentation document after discussion regarding the issues and problem of DoW and what we learnt in Japan. They expressed their idea what they learnt and felt in Japan with heartfelt thanks to relevant people and organization of this counterpart training.

Discussion about issues of DoW

Presentation by trainees

Closing ceremony with certification

The trainees also experienced Japanese traditional culture and cutting edge technologies.
