

# Project of Capacity Development for the Implementation of Agricultural Insurance

July 2020

## Latest News

It has been two and a half years since the Project started, and we are at the halfway of the Project. The Government of Indonesia and JICA (Japan International Cooperation Agency) have jointly conducted a mid-term evaluation in February 2020. The results of the evaluation, and the activity plans for the second half of the Project were presented and endorsed at JCC (Joint Coordinating Committee).

JCC Meeting

## NEWS Mid-term evaluation and further activities

The Project has conducted training and surveys with the aim of implementing AOTP (agricultural insurance for paddy) and strengthening its implementation so that small-scale rice farmers can continue to engage in agriculture even when they are severely damaged by natural disaster, pests and so on.

### Plans for the second half

In the latter half of the Project, the Project will; 1. Promote the establishment of a decision making body for agricultural insurance that brings together related agencies and organizations 2. Develop materials and human resources in the target areas (East Java Province and South Sulawesi Province) so that AOTP will be more widely known and implemented. 3. Implement feasibility study for Area Yield Index Insurance, in West Java Province.

## BMKG DRY SEASON FORECAST CONFERENCE

BMKG (Indonesian Agency for Meteorology, Climatology and Geophysics) held the above conference from 25<sup>th</sup> Feb. for 4 days. Dr. Kurihara from Japan Meteorological Business Support Center, who is the JICA short term expert, gave a presentation on the seasonal forecast in Japan.
