

Project of Capacity Development for the Implementation of Agricultural Insurance

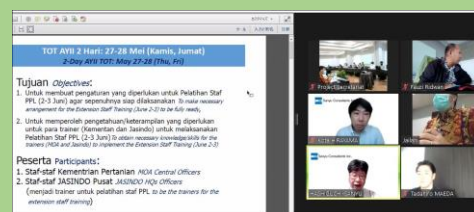

June 2021

Training of Trainers on AYII

Toward the start of the pilot activity on AYII (Area Yield Index Insurance) in Karawang District in West Java Province, the Project conducted a two-day Training of Trainers (TOT) on 27-28 May 2021. The main participants were the staff of the Ministry of Agriculture and JASINDO, a state-owned insurance company. Approximately 27 persons participated and actively learned about the AYII. These participants will be the trainers to train the agriculture extension workers, who will then inform and facilitate farmers to join the AYII in the pilot sites.

Training for Extension Workers

Following the TOT in May, the Project conducted a training for agricultural extension workers in Karawang District on 16-17 June 2021. The pilot activity of AYII will be conducted in 15 villages in 5 sub-districts, covering a total of 6,000 Ha. The agricultural extension workers who are responsible for these area joined the training. In addition to the Ministry of Agriculture and JASINDO, BPS (Statistics Indonesia) also participated as lecturers, and taught mechanism of AYII, differences between index-based and indemnity-based insurances, and CCE (Crop Cutting Experiments), which is the key to trigger the insurance payout. At the training, the participants set the targets for numbers of farmer groups to be socialized and the number of farmers to join AYII insurance in their respective areas, and made their workplan accordingly.
