

# Project of Capacity Development for the Implementation of Agricultural Insurance

February 2022

## Toward Sustainable Training on Agricultural Insurance

In 2021, the Project held two Training of Trainers of AOTP (Indemnity based agricultural insurance for paddy) for agricultural extension workers in East Java and South Sulawesi Provinces. The third training will be held in March 2022, and it will be an opportunity to hand over the AUPT Trainings from the Project to the Ministry of Agriculture and BAPPENAS (Ministry of National Development Planning). In order to ensure the sustainability of the training, BPPSDMP (Agricultural Human Resources Extension and Development Agency) will be invited to the training and it is expected that their trainers would become the master trainers for the agricultural insurance. Since the next training will be the last training to be organized by the Project, the Project is currently reviewing the lessons learnt from the previous trainings to be reflected to the last training.

## Preparing Next AYII Pilot

Preparations and coordination are underway for the pilot projects of AYII (Area Yield Index Insurance) in 2 pilot areas. In Kendal District, Central Java, historical yield data was analyzed and premiums were set. In Karawang District, West Java, preparation for the 2<sup>nd</sup> pilot activity is ongoing, following the results of the 1<sup>st</sup> pilot activity conducted in last planting season. The preparation includes the revision of guidelines and compiling operation manual that could be used by those who work in the field.

Discussion on guideline at MOA

## Harvest at Pilot Region

On 25 January, the JICA expert team and the Ministry of Agriculture visited the Karawang District Agricultural Department to discuss on the AYII pilot and observed the CCE (Crop Cutting Experiment) of the harvest time at one of the pilot sites.
