

Disaster Management Plan is Needed for Disaster Management

At this moment, natural disaster is getting more complex and getting wider in all over Indonesia. Therefore, it should be handling in a good way by government, community, and institution. Therefore, disaster management plan is needed for disaster management.

It was said by Director General of water resources, Ministry of Public Works Mochammad Amron while opening Workshop on Volcanic Eruption Disaster mitigation, ON Thursday (15/9) in Jakarta. The other participants who was coming for the event is Director of River and coastal Pitoyo Subandrio; Director of Operation and Maintenance Hartanto, the representative from Yachiyo Engineering, CO.Ltd of Japan, Kazuhiko Otani.

Mt. Merapi eruption between on October- November 2010 then followed by rains flow in some river channel which coming from the upper of Mt. merapi we giving a lesson and experience for us, that disaster management should be study in gradually and continually based on disaster management plan in comprehensively and sustainability, said Amron.

As we know that jantiral disaster could be occurred in anytime without notice. Therefore, we needs preparedness and alertness activity to reduce risk because of disaster, especially for Ministry of Public Works, Directorate General of water resources based on constitution UU No 7 by the year 2007, Amron added.

After Mt. Merapi erupstion on October 2010, Director general of water resources, Ministry of Public Works was gave a letter to Japan Embassy to support and gives the facilitation to study for eruption disaster management by holds some activities, and one the activity is holding a workshop to share some information and experience for eruption disaster management.

Therefore, we are hoping that this workshop could gives results for studying that have been implemented, and could have many suggestion and recommendation for better results in eruption disaster management for reconstruction and rehabilitation during due to Mt. Merapi eruption disaster.
