The first home visit is for the follow-up of the mother and newborn after the delivery

Schedules of the check-up by the midwife should correspond to CHT's home visit!

Refer to MC BOOK p 25, and then mark appropriate columns

- DIRECTIONS**
- ASK mothers about each status on the column, and then CHECK the Mother and Child Book for accuracy.
  - CHT members should conduct home visits to remind a mother of her postpartum check-up & newborn check-up by the midwife. The date of CHT's home visit should correspond to mother's postpartum and newborn checkups.
  - The first postpartum and newborn care is usually done at hospital right after the delivery, and that will be considered as the first visit.
