

MNCHN INTEGRATION AT THE ILHZ AGENDA

1

OUTLINE

- ✘ Objective of the session
- ✘ The MNCHN Strategy
- ✘ Integration process

2

OBJECTIVES OF THE SESSION:

- ✘ Understand the factors affecting the maternal and newborn death and key strategic response to MNCHN Situation;
- ✘ Understand the continuum of MNCHN as it relates to integration in ILHZ;
- ✘ Familiarize and understand the steps in the program implementation cycle where MNCHN can be integrated in ILHZ; and
- ✘ Practice in integrating MNHCN into ILHZ.

3

BACKGROUND

- ✘ Maternal mortality remains as one among the burdens in the health sector (*JICA, 2011*)
- ✘ Rate of decline still found at slow which unlikely to meet the MDG target (*MNCHN MOP, 2009*).
- ✘ While the government has put health reforms in place and continues to campaign for better health facilities, lack of support and awareness with regard to maternal and newborn care and health services from both the community and local leaders contributes to the rate of maternal and infant deaths (*UNICEF, 2009*)
- ✘ Weak adoption of MNCHN MOP at the local level.

4

CAUSES OF MATERNAL, NEONATAL AND INFANT MORTALITY

- ✘ Delay in identification of complications;
- ✘ Delay in referral; and
- ✘ Delay in the management of complication.

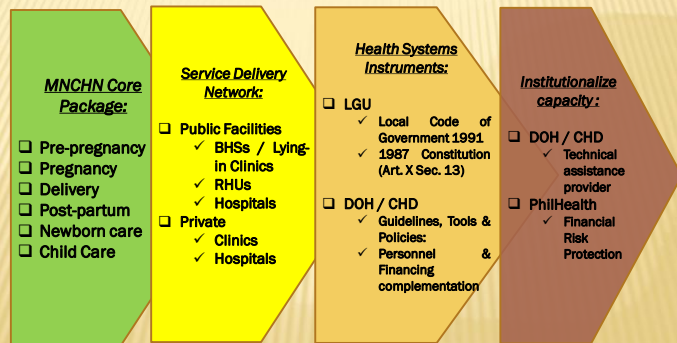

5

WHAT IS MNCHN STRATEGY?

- ✘ A policy to implement the health reform for rapid reduction of maternal and neonatal mortality (DOH A.O.#2008-0029).
- ✘ Detailed at the manual of operation (MOP) which provides direction on delivering a package of maternal, newborn, child health and nutrition services
