

How to Use the CMMNC Guidebook

PPT 2

Rationale

- Few health facilities on the ground are capable of providing Basic Emergency Obstetric Care (BEmOC)
- Essential that health professionals in health facilities are competent to provide basic skills needed to contribute to reduce MMR and IMR in the communities

Sections of the CMMNC Guidebook

Section 1

- **Understanding the Implications of the Three Delays**

Section 2

- **Framework of the Community-Managed Maternal and Newborn Care**

Section 3

- **Providing Basic Clinical Interventions for Maternal and Newborn Complication**

Topics Include:

- ✓ Quick Check
- ✓ Referral
- ✓ Prenatal Care
- ✓ Care during labor, childbirth and immediate postpartum
- ✓ Postpartum Care
- ✓ Information and Advice on MCH

Sections of the CMMNC Guidebook

Section 4

- **Management of Maternal and Newborn Health Services**

Annex

- **Forms and records for the mother and health professionals**

- **Supplementary facts about Maternal Death Review, Newborn Screening and Philhealth Accreditation for Midwives**

Importance of the Guidebook

- Will provide standard reference for maternal and newborn care at the community level
- Assures delivery of quality maternal and newborn services
