

# **MONITORING AND EVALUATION**

PPT 20

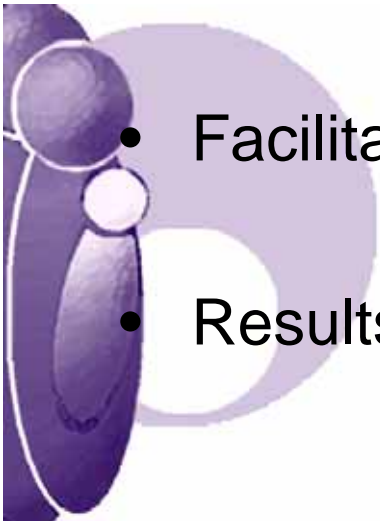

# What is Monitoring & Evaluation?

- **Monitoring** – means of collecting and recording information to assess the results of inputs, outputs and processes during and even after training
- **Evaluation** – means of reviewing the outcomes and impact of a training after a defined period of time

# What do we monitor and evaluate?

- Learning outcomes of the participants
- Training process (sessions and activities, methodologies)
- Training content
- Facilitators and Resource Speakers
- Results of the training

# What tools, indicators or mechanisms do we use?

## During Training

- Pre-test/ Post-test
- Daily Evaluation Forms
- Over-all Evaluation Forms
- Checklist

# What tools, indicators or mechanisms do we use?

## Post Training

Outcome indicators such as:

- Number of deliveries attended by skilled birth attendants at home
- Number of deliveries occurring in facilities with EmOC capability
- Number of pregnant women with prenatal care
- Number of mothers with post natal care
- Number of babies with newborn screening
- Patient Satisfaction (survey among clients, exit interviews, observation checklist, etc.)
- Formalized partnership with barangay, NGOs, civil societies, POs, on formation of health team
- Transportation and communication systems in place for referral

# Who will conduct the M&E?

- Training team
- Trainees
- Co-workers/ Colleagues
- Community partners
- Patients/ End Users
