

## Greetings

Hi, We are JICA RWANDA.  
Let's work together to realize *"inclusive and dynamic development"*

## About JICA

- **What is JICA?**

JICA is an implementation agency of Official Development Assistance (ODA) by the Government of Japan. JICA is the largest bilateral agency with various instruments including technical assistance, grant aid, loan aid and volunteers.

- **Why JICA in Rwanda?**

We are here to support the efforts of Rwandan people to realize the social and economic development of Rwanda.

- **How does JICA contribute to Rwanda?**

We believe that capacity development of Rwandan people, institutions and communities is a key for sustainable development and growth.

So, instead of implementing activities by ourselves, we put emphasis on the ownership and initiatives of our Rwandese counterpart individuals and institutions .

## JICA Volunteers support the community in daily activities

Japan International Cooperation Agency

# Four Main Sectors for Capacity Development

## Economic Infrastructure

“Building foundations for Economic Development”

We promote development of infrastructure and management skills for electricity and regional Integration.

## Water & Sanitation

“Increasing Safe Water Access”

We extend Water Supply Infrastructure and strengthen management of Water Supply Systems.

### Our Instruments

- Grant Aid
- Concessional Loan
- Technical Cooperation
- Volunteer

## Agriculture

“Increasing Farmers’ Income from Agriculture”

We support small farmers to increase their income through developing their marketing & cultivation skills.

## Education

“Encouraging Human Resource for Development”

We promote skilled teaching system at Basic Education and ensure Post-Basic Education to be tailored to meet labor market needs.

## Voices from counterparts

Our college staff can produce competitive graduates for the labor market.

(Pascal Gatabazi , Principal, Tumba College of Technology)

O&M<sup>(operation & maintenance)</sup> capacity has improved through proper capacity building mechanisms

(Robert NYAMVUMBA, Energy Division Manager in MININFRA)

Community can now drink and use clean water by good maintenance of water facilities

(Emmanuel Mwizerwa, Agronomist of Kabarondo Sector)

We can now get and analyze market information to plan our cultivation.

(Mr. Antoine Nzabagerageza President of COPABINYA Cooperative)
