

## THE PROJECT FOR MANAGEMENT CAPACITY ENHANCEMENT OF SSUWC PHASE2

### Project Profile

Duration: February 2016 – February 2020  
Budget: JPY 530 Million  
Type: Technical Cooperation  
Location: Juba, Jubek State  
Partners: Ministry of Water Resources and  
Irrigation, South Sudan Urban Water  
Corporation (SSUWC)  
SDGs: Goal 6 (Clean water & sanitation)

*SSUWC technician studying the water quality test*

JICA aims to strengthen basic capacity for operation and maintenance of the water facility by:

- 1) Strengthening of water charge collection capacity,
- 2) Enhancement of public awareness activities of Juba citizens,
- 3) Strengthening of non-revenue water management capacity,
- 4) Strengthening of operation and maintenance capacity for new and existing water supply facilities and
- 5) Strengthening the support and supervisory function of SSUWC-HQ

12 International experts who have expertise on water supply are dispatched during the project.

The project is supporting SSUWC Juba Station to operate and maintain the new water supply facilities which are currently under construction by Japanese grant aid.

*SSUWC technician studying the connection of pipe*

*Students visiting the water treatment facility*
