The Study on National Power Development Plan in the Period of 2006 -2015, Perspective up to 2025

Background
In order to meet growing power demand, Electricity of Vietnam (EVN) has a mission for preparing the national power development plan in the period of 2006 -2015, perspective up to 2025 (PDP 6th) that will be approved by the Government of Vietnam. To enhance the preparation of PDP 6th that will ensure stable power supply for a long term, JICA decided to assist EVN to conduct the study on national power development plan in the period of 2006 - 2015, perspective up to 2025.

Overall Goal/ Objective

(Project Objective)
The Study aims at assisting EVN to prepare PDP 6th

Major Activities
The Study will be carried out the following items of many necessary works for preparing PDP 6th:
- Review of implementation of 5th master plan;
- Preparation of PDP 6th including power demand forecast, primary energy source for power development, optimization of power generation development plan, optimization of power network development plan, financial and economic analysis;
- Environmental and social considerations;
- Finalization of PDP 6th;
- Capacity development

Counterpart
Electricity of Vietnam (EVN)
