Technical Cooperation Project for Strengthening Cluster-based Teacher Training and School Management in Vietnam

Background

In line with the Educational Development Strategic Plan 2001-2010 (EDSP 2001) and the National Education for All (EFA) Action Plan 2001-2015, which describe mid-term target necessary to improve nation’s education, in the Primary Education Development Program (PEDP) which was formulated in 2004 by the support from the Government of Japan, six issues were selected as prioritized areas including: 1) Strengthening education management; 2) Improving pre-service training provision; 3) Improving facilities; 4) Improving quality in the classroom; 5) Overcoming barriers in assessing primary education; 6) Strengthening educational finance and socialization. To improve prioritized areas of the education of Vietnam, the Government of Vietnam requested the Government of Japan to continue education support in 2003. In response to this request, the Technical cooperation project: “Strengthening Cluster-based Teacher Training and School Management started in September 2004.

Overall Goal/ Objective

1) Overall goal: A developed Model through technical cooperation will be applied to other provinces as national model.
2) Project’s Purpose: An effective model to apply new curriculum will be developed in the pilot province.

Major Activities

- Developing a system to improve teaching method in the pilot province (target: teacher)
- Developing a system to support the improvement of teaching method in the pilot province (target: principals and local education officers)
- Preparing for the application of the Model to other provinces.

Counterpart

Central Agency: Primary Education Department, MOET
Counterpart: Department of Education and Training (DOET), Bac Giang Province

Duration

September 2004 ~ September 2007
