JICA’s volunteer program is one of Japan’s technical cooperation schemes operated as part of its Official Development Assistance (ODA). The program dispatches eager Japanese citizens who wish to participate in assisting developing countries and also have the adequate skills, knowledge and experience to answer the calls for assistance from their governments.

The program has three objectives:
1. To cooperate in the economic and social development, as well as the reconstruction of developing countries
2. To promote international goodwill and deepen mutual understanding
3. To develop international perspectives and give back the experience to the Japanese community

Since its first dispatch to Laos in 1965, more than 48,000 JICA volunteers have worked alongside local communities in 96 countries and regions. As summarized by the phrase "together with the local community," JICA volunteers live and work at the grassroots level, speaking the same language as the local communities and carrying out activities with an emphasis on fostering self-reliance for sustainable change. Volunteers are generally dispatched for two-years, in various fields ranging from education, nursing to auto mechanics, IT, and sports.

**Types of Volunteer Program**

**Japan Overseas Cooperation Volunteers (JOCVs)**
One of the oldest volunteer programs in the world, it was inaugurated in 1965. The program targets those between ages 20 and 39. To date, more than 40,000 Japanese volunteers have been dispatched to 88 countries.

**Senior Volunteers**
The program began in 1990 and targets those between ages 40 and 69. Most participants join the program after retiring from successful careers in Administration, Primary Education, and Vocational Training. To date, over 5,700 people have been dispatched to 73 countries.

**Youth and Senior Volunteers for Nikkei Communities**
Started in 1985, the program sends volunteers to assist in the development of Nikkei (Japanese Descendant) communities in Latin America. Many volunteers cooperate in Japanese Language Education, Vocational Training and Social Welfare Services, while also fostering further understanding of Japanese culture. Since the start of the program, a total of 1,250 people have been dispatched as Youth Volunteers and 450 people as Senior Volunteers for Nikkei communities in nine countries.
Volunteers contribute to the Sustainable Development Goals

**Administration / Business / Tourism**
Volunteers help facilitate community development using various approaches such as establishing small income-generation projects with local groups to create additional income. Additionally, volunteers with knowledge and experience in public administration work in municipal governments or other organizations to provide better services to its citizens and customers.

**Categories**
Community Development, Public Administration, Disaster Prevention and Disaster Relief, Statistics, Computer Technology, Marketing, Tourism, and others.

**Medical Care / Health Care / Social Welfare**
Volunteers work to provide better health care and increased access to information through assisting in skills development of local health care professionals as well as promoting awareness of various health-related issues.

**Categories**

**Education**
The activities of volunteers in Education may expand from assisting the learners to improve their scholastic proficiency in various subjects or working with regional educational departments to organize teacher training programs to introduce alternative or new teaching methods.

**Categories**

**Sports**
Many volunteers help coach and train national sports teams of developing countries, but sports can also be utilized to promote better health and social skills for children as well. Volunteers provide technical advice and training know-how to teams and players at all levels.

**Categories**
Baseball, Judo, Table Tennis, Gymnastics, Water Polo, and others.

**Agriculture / Forestry / Fisheries**
Volunteers contribute to improve productivity, food security, and increase profitability by introducing best practices, management systems and new techniques in each field.

**Categories**
Food Crops & Rice Culture, Vegetable Growing, Animal Husbandry, Forestry and Afforestation, Aquaculture, and others.

**Public Works / Utilities**
State-of-the-art technologies of Japan are in great demand all over the world. Supervision and advice from volunteers with advanced skills and practical experience help partner institutions to improve the quality and efficiency of their projects.

**Categories**
Civil Engineering, Landscape Architecture, Architecture, Surveying, Telecommunications, and others.

**Manufacturing / Energy**
Volunteers with upgraded technical skills provide direct supervision and advice to their local counterparts/students in municipal governments of vocational training facilities to help train technicians in each field.

**Categories**

**Japanese Language Education**
Volunteers assist to improve Japanese language skills of those who aspire to become Japanese language teachers or seek employment opportunities in areas such as tourism. Volunteers are also dispatched to Nikkei communities in Latin America to teach Japanese language as well as culture to those of Japanese descent.

**Categories**
Japanese Language Education, Nikkei School Teacher (Japanese Language)

**Additional Information**
Volunteers help facilitate community development using various approaches such as establishing small income-generation projects with local groups to create additional income. Additionally, volunteers with knowledge and experience in public administration work in municipal governments or other organizations to provide better services to its citizens and customers.

Volunteers contribute to the Sustainable Development Goals by providing education, medical care, sports, agriculture, etc., to help develop communities and improve the quality of life.
A BRIDGE SPANNING A HALF CENTURY
Japan Overseas Cooperation Volunteers (JOCVs)

The JOCVs, five Japanese youths, landed in Laos in 1965. In the 50 years since their arrival, successive volunteers have preserved the spirit of those pioneers in working closely with local residents, serving as a bridge linking Laos and Japan. More recently, an hour north by plane from Vientiane, in the remote province of Oudomxay, is a productivity and marketing center run by the province’s Department of Industry and Commerce. The region was once notorious for its production of opium poppies. Currently, programs are underway to reduce reliance on poppy farming by promoting the production of handicrafts as a means for residents to earn a living. The center plays an important role in this process, overseeing the sale and distribution of finished products.

Making Products with a Local Touch

Traditional raised-floor dwellings stand side by side in the village of Mang, a small community inhabited by the Khmu, one of Laos’s many ethnic groups. Life moves along traditional lines in this highland region, located an hour and a half by car from the center along winding mountain roads. Arai notes that the village women have very impressive skills. In a display of this prowess, a woman deftly uses a knife to split kudzu vines and remove the inner fiber, which she quickly twists into a thimblepiece of twine. These light cords, which retain their strength even when wet, are woven into bags. Watching as the Khmu women apply traditional skills passed down over generations, Arai interjects: “This may look easy, but it is very difficult.” Seang, the leader of one women’s group, smiles as she explains how it is fun making bags with Arai, whom she calls Taka. As she goes about her duties, Seang emanates an aura of warmth, community, and heartiness that remains prevalent in this region even as it seems to be fading in developed countries like Japan.

Toward the Future, Side by Side

The JOCVs, five Japanese youths, landed in Laos in 1965. In the 50 years since their arrival, successive volunteers have preserved the spirit of those pioneers in working closely with local residents, serving as a bridge linking Laos and Japan. More recently, an hour north by plane from Vientiane, in the remote province of Oudomxay, is a productivity and marketing center run by the province’s Department of Industry and Commerce. The region was once notorious for its production of opium poppies. Currently, programs are underway to reduce reliance on poppy farming by promoting the production of handicrafts as a means for residents to earn a living. The center plays an important role in this process, overseeing the sale and distribution of finished products.

Making Products with a Local Touch

Traditional raised-floor dwellings stand side by side in the village of Mang, a small community inhabited by the Khmu, one of Laos’s many ethnic groups. Life moves along traditional lines in this highland region, located an hour and a half by car from the center along winding mountain roads. Arai notes that the village women have very impressive skills. In a display of this prowess, a woman deftly uses a knife to split kudzu vines and remove the inner fiber, which she quickly twists into a thimblepiece of twine. These light cords, which retain their strength even when wet, are woven into bags. Watching as the Khmu women apply traditional skills passed down over generations, Arai interjects: “This may look easy, but it is very difficult.” Seang, the leader of one women’s group, smiles as she explains how it is fun making bags with Arai, whom she calls Taka. As she goes about her duties, Seang emanates an aura of warmth, community, and heartiness that remains prevalent in this region even as it seems to be fading in developed countries like Japan.

Arai is involved in helping the women of the community to utilize traditional skills in creating handicrafts to sell to tourists. Previously, Seang and the other women had been weaving kudzu into shoulder bags, but they proved unpopular with tourists because of their size. To address the issue, the women have begun weaving smaller bags and introducing new design aspects, such as creating striped patterns using dyed twine.

Mayphone Silivong, the manager of the center’s promotion and product development section, shares her Japanese colleague’s ambitions for the center. “We hope to create products that have a broad appeal to consumers,” explains Silivong. “Our ultimate goal is to begin exporting them.” For the women in the village, starting new projects is not always an easy task. According to Arai, it is hard to adequately convey ideas through words alone. “The first thing I do is show an example of what I’m trying to explain,” he says. “After that, I leave it in the hands of the local residents at the center.” The result has been an ongoing effort to create new and original products.
